Carbofuran; Receipt of Application for Emergency Exemption, Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request flowable carbofuran (Furadan 4F Insecticide/Nematicide) (EPA Reg. No. 279-2876) to treat up to 300,000 acres of cotton in California to control cotton aphid. The applicant proposes the use of a chemical which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and is intended for a use that could pose a risk similar to the risk posed by uses evaluated under the Special Review. The granular formulation of carbofuran was the subject of a Special Review between the years of 1986-1991, which resulted in a negotiated settlement whereby most of the registered uses of granular carbofuran were phased out. While the flowable formulation of carbofuran is not the subject of a Special Review, EPA believes that the proposed use of

flowable carbofuran on cotton could pose a risk similar to the risk assessed by EPA under the Special Review of granular carbofuran. EPA is soliciting public comment before making the decision whether or not to grant the exemption. On September 4, 2003, the California Department of Pesticide Regulation declared a crisis exemption for this use to treat up to 200,000 acres of cotton in California.
