

and opportunities for stakeholder consultation.

EPA worked extensively with affected parties to reach the decisions presented in the interim risk management decision document, which conclude the pilot public participation process for dicotophos. As part of the pilot public participation process, numerous opportunities for public comment were offered as the interim risk management decision document was being developed. The dicotophos interim risk management decision document therefore is issued without a formal public comment period concluding review of the individual organophosphate pesticide. The docket remains open, however, and any comments submitted in the future will be placed in the public docket.

The risk assessments for dicotophos were released to the public through notices published in the **Federal Register** on November 10, 1999 (64 FR 61332) (FRL-6393-9), and June 14, 2000 (65 FR 37371) (FRL-6593-4).

EPA's next step under FQPA is to complete a cumulative risk assessment and risk management decision for the organophosphate pesticides, which share a common mechanism of toxicity. The interim risk management decision document on dicotophos cannot be considered final until this cumulative assessment is complete.

When the cumulative risk assessment for the organophosphate pesticides has been completed, EPA will issue its final tolerance reassessment decision for dicotophos and further risk mitigation measures may be needed.
