Title: Vehicle Engine Service Information Amending Motor Vehicle Emission Certification and Fuel Economy Compliance.

Abstract: Under Title II of the Clean Air Act, (42 U.S.C. 7521 *et seq.*), EPA is charged with requiring the manufacturers of vehicles and engines to make available emissions-related repair information to aftermarket service providers. To improve timely access to this information, EPA is requiring that vehicle and engine manufacturers provide access to the required emissions-related information in full-text via the World Wide Web. To ensure compliance with these statutes, EPA is requiring that manufacturers measure the performance of their Web sites as outlined in preamble to the Final Rule making and report this information to EPA in electronic format on an annual basis. EPA will review the information to determine that the manufacturers subject to the proposed Web site requirements have developed Web sites with sufficient infrastructure to support potentially thousands of aftermarket service providers at any given time.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 100 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or

for a Federal Agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collection, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

Respondents/Affected Entities: The respondents are motor vehicle manufacturers, SIC code 3711.

Estimated Number of Respondents: 45.

Frequency of Response: Annually.
Estimated Total Annual Hour Burden: 4,500.

Estimated Total Annual Cost: \$265,500 includes \$72,000 annualized capital costs.

Changes in the Estimates: There is an increase of 4500 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to the fact that this is a new reporting requirement for manufacturers and the burden estimates are being revised accordingly.

Dated: October 15, 2003.

Doreen Sterling,

Acting Director, Collection Strategies Division.
