

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the GDOT, will prepare a supplemental draft EIS to construct a new location roadway between US41 and I-75 in Bartow County, Georgia for a distance of approximately 7.5 miles. This new location extension of US411 is needed to provide additional capacity and congestion relief for the existing roadway network, which currently includes common sections of US411, SR 61 and SR20 to access I-75. This project would provide direct, multi-lane access from Rome to I-75 and is one of the final connecting links in the Memphis to Atlanta Connector.

A Final EIS for this project was approved January 9, 1989, and the Record of Decision was signed May 25, 1989. In 1991, a suit was filed against the USDOT, FHWA and the GDOT on this project. In 1993, the United States District for the Northern District of Georgia acknowledged the need for the project and confirmed its independent utility from a larger east-west connector known as the Northern Arc. However, the document was ruled inadequate because it failed to adequately study a full range of alternatives. The proposed Supplemental draft EIS will address and study a full range of alternatives for this corridor and will provide updated studies and analyses on the alternatives originally studied.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies. A public hearing will be held and a public notice will be given of the time and place of the hearing.

To ensure that the full range of issues related to this proposed project is addressed and all significant issues identified in the EIS, formal scoping will be reinitiated. Additionally, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action should be directed to the FHWA at the address provided above.

SUMMARY: The Federal Transit Administration (FTA) is issuing this notice to advise other agencies and the public that, in accordance with the National Environmental Policy Act and its implementing regulations, FTA and the New Jersey Transit Corporation (NJ TRANSIT), in partnership with the Port Authority of New York & New Jersey (PANYNJ), intend to prepare an Environmental Impact Statement (EIS) to evaluate alternatives that increase transit capacity across the Hudson River to meet the growing demand for travel between midtown Manhattan (23rd Street to 59th Street, Hudson River to East River) and west-of-Hudson points in New Jersey and New York. NJ TRANSIT is the local sponsoring agency for this EIS. Among the alternatives to be considered is the construction of a new trans-Hudson River rail tunnel and additional infrastructure improvements in New Jersey and proximate to Penn Station New York (PSNY) to improve train and commuter capacity. I. Scoping

The FTA, NJ TRANSIT, and the PANYNJ invite all interested individuals and organizations, and federal, state, and local agencies to comment on the scope of the EIS. During the scoping process, comments should focus on identifying specific social, economic, or environmental issues to be evaluated, or on proposing alternatives that may be less costly, more cost effective or have fewer environmental impacts while achieving similar transportation objectives. At this time, comments should not focus on a preference for a particular alternative.

Following the public scoping process, public outreach activities will include
