

receiving an access badge. Foreign nationals attending this meeting will be required to provide the following information: full name; gender; date/place of birth; citizenship; visa/greencard information (number, type, expiration date); employer/affiliation information (name of institution, address, country, phone); title/position of attendee. To expedite admittance, attendees can provide identifying information in advance by contacting Ms. Marla King via email at marla.k.king@nasa.gov or by telephone at (202) 358-1148. Attendees will be escorted at all times.

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

June W. Edwards,

*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

BILLING CODE 7510-01-P

NATIONAL COUNCIL ON DISABILITY

International Watch Advisory Committee Meetings (Conference Calls)

Time and Dates for 2004: 12 noon, Eastern Time, January 15, March 4, May 6, July 8, September 2, November 4.

Place: National Council on Disability, 1331 F Street, NW., Suite 850, Washington, DC.

Agency: National Council on Disability (NCD).

Status: All parts of these conference calls will be open to the public. Those interested in participating in conference calls should contact the appropriate staff member listed below. Due to limited resources, only a few telephone lines will be available for each conference call.

Agenda: Rollcall, announcements, overview of accomplishments, planning, reports, new business, adjournment.

For Further Information Contact: Joan M. Durocher, Attorney Advisor and Designated Federal Official, National Council on Disability, 1331 F Street, NW., Suite 850, Washington, DC 20004; (202) 272-2004 (voice), (202) 272-2074 (TTY), (202) 272-2022 (fax), jdurocher@ncd.gov (e-mail).

International Watch Advisory Committee Mission: The purpose of NCD's International Watch is to share information on international disability issues and to advise NCD on developing policy proposals that will advocate for

a foreign policy that is consistent with the values and goals of the Americans with Disabilities Act.

Dated: November 12, 2003.

Ethel D. Briggs,

Executive Director.

BILLING CODE 6820-MA-P

NATIONAL CREDIT UNION ADMINISTRATION

Sunshine Act; Meetings

TIME AND DATE: 10 a.m., Thursday, November 20, 2003.

PLACE: Board Room, 7th Floor, Room 7047, 1775 Duke Street, Alexandria, VA 22314-3428.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. NCUA's Annual Performance Plan for 2004.
2. Advance Notice of Proposed Rulemaking: Interagency Proposal to Consider Alternative Forms of Privacy Notices.
3. NCUA's Operating Budget for 2004/2005.
4. NCUA's Overhead Transfer Rate.
5. NCUA's Operating Fee Scale for 2004.

RECESS: 11:15 a.m.

TIME AND DATE: 11:30 a.m., Thursday, November 20, 2003.

PLACE: Board Room, 7th Floor, Room 7047, 1775 Duke Street, Alexandria, VA 22314-3428.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Administrative Action under section 206 and 208 of the Federal Credit Union Act. Closed pursuant to Exemptions (5), (8), (A)(ii), and 9(B).
2. Administrative Action under part 708 of NCUA's Rules and Regulations. Closed pursuant to Exemption (8).

Becky Baker,

Secretary of the Board.

NATIONAL SCIENCE FOUNDATION

Notice of Permits Issued Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permits issued under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish

notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT:

Nadene G. Kennedy, Permit Office, Office of Polar Programs, Rm. 775, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

SUPPLEMENTARY INFORMATION: On October 8, 2003, the National Science Foundation published a notice in the **Federal Register** of permit applications received. A permit was issued on November 6, 2003 to Terry J. Wilson (2004-016).

Nadene G. Kennedy,

Permit Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-413, 50-414, 50-369 and 50-370]

Duke Energy Corporation, et al., Catawba Nuclear Station, Units 1 and 2, McGuire Nuclear Station, Units 1 and 2; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF-9 and NPF-17, issued to Duke Power Company (the licensee), for operation of the McGuire Nuclear Station (McGuire), Units 1 and 2, located in Mecklenburg County, North Carolina and to Facility Operating License Nos. NPF-35 and NPF-52, issued to Duke Power Company, et al. (the licensee), for operation of the Catawba Nuclear Station (CNS), Units 1 and 2, located in York County, South Carolina.

The proposed amendments, requested by the licensee in a letter dated March 24, 2003, as supplemented by letters dated June 25, 2003, and October 15, 2003, would revise the Technical Specifications (TSs) to relocate reactor coolant system cycle specific parameter limits from the TS to the core operating limits reports for the Catawba and the McGuire Nuclear Stations. The proposed amendments would also revise the required minimum measured reactor coolant system flow rate from 390,000 gallons per minute (gpm) to 388,000 gpm for McGuire, Units 1 and 2 and Catawba, Unit 1. Associated changes have also been proposed for the TS Bases section.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a

margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below.

As required by 10 CFR 50.91(a)(1), this analysis is provided to demonstrate that the proposed license amendment does not involve a significant hazard.

Conformance of the proposed amendment to the standards for a determination of no significant hazards, as defined in 10 CFR 50.92, is shown in the following:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

No. The reduction in McGuire Units 1 and 2, and Catawba Unit 1 [reactor coolant system] RCS minimum measured flow (MMF) from 390,000 gpm [gallons per minute] to 388,000 gpm will not change the probability of actuation of any Engineering Safeguard Feature or any other device. The consequences of previously analyzed accidents have been found to be insignificantly different when this reduced flow rate is assumed. The system transient response is not affected by the initial RCS flow assumption unless the initial assumption is so low as to impair the steady-state core cooling capability or the steam generator heat transfer capability. This is clearly not the case with a 0.5% reduction in RCS flow.

The relocation of Reactor Coolant System (RCS) related cycle-specific parameter limits from the Technical Specifications (TS) to the Core Operating Limits Reports (COLR) proposed by this amendment request does not result in the alteration of the design, material, or construction standards that were applicable prior to the change. The proposed change will not result in the modification of any system interface that would increase the likelihood of an accident since these events are independent of the proposed change. The proposed amendment will not change, degrade, or prevent actions, or alter any assumptions previously made in evaluating the radiological consequences of an accident described in the UFSAR. Therefore, the proposed amendment does not result in the increase in the probability or consequences of an accident previously evaluated.

(2) Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

No. This change does not create the possibility of a new or different kind of accident from any accident previously evaluated. No new accident causal mechanisms are created as a result of NRC approval of this amendment request. No changes are being made to the facility which should introduce any new accident causal mechanisms. This amendment request does not impact any plant systems that are accident initiators.

(3) Does the proposed change involve a significant reduction in margin of safety?

No. Implementation of this amendment would not involve a significant reduction in the margin of safety. The decrease in

McGuire Units 1 and 2, and Catawba Unit 1 RCS MMF has been analyzed and found to have an insignificant effect on the applicable transient analyses found in the UFSAR. Previously approved methodologies will continue to be used in the determination of cycle-specific core operating limits appearing in the COLRs. Additionally, the RCS minimum total flow rates for McGuire and Catawba are retained in their respective TS so as to assure that lower flow rates will not be used without prior NRC approval. Consequently, no safety margins will be impacted.

Based on the above, it is concluded that the proposed license amendment request does not result in a reduction in margin with respect to plant safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Documents may be examined, and/or
