Title: National Atlas of the United States of America.

Current OMB approval number: 1028-0057.

Abstract: Potential customers of electronic national atlas products will be asked questions that provide (1) potential uses of these products; (2) type of personal computer used; (3) current method of acquiring atlas-type information; (4) demographic information; and (5) personal expectations from the products. Survey questionnaires will be distributed by mail in the return postage-paid format and via the World Wide Web. Focus groups will be held at various locations across the United States and could include prototype product testing. Software usability studies will be conducted at various locations and will result in the development of products that are easier to use. Customer information gathered from the questionnaires, focus groups, and usability studies will be used to evaluate the National Atlas of the United States products and to make development adjustments based on customer responses. The proposed collection is limited in scope to the National Atlas products and the capability of the products to meet customer needs. The USGS intends to develop a cooperative research and development agreement with private industry to assist in product development and to provide an additional avenue for product distribution.

Bureau form number: None.

Frequency: An estimated 2-3 surveys, and 2-5 focus group studies per year to evaluate potential customer segments and reactions.

Description of respondents: Owners of powerful home personal computers, some with Internet access—potentially the general public, libraries, and schools.

Estimated completion time: Varies depending on the mechanism used: approximately 15 minutes per survey and 1 hour per focus group session.
