The Commission also tailored to the needs of small and mid-sized local telephone companies serving rural and high-cost areas, and will help provide certainty and stability for rate-of-return carriers, encourage investment in rural America, and provide important consumer benefits.

Number of Respondents: 31,800 respondents; 39,300 responses.

OMB Control No.: 3060-XXXX.

Title: Section 1.929(c)(1), Composite Interference Contour (CIC).

Form No.: N/A.

Type of Review: New collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local and tribal government.

Number of Respondents: 50.

Estimated Time Per Response: 2 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Total Annual Burden: 100 hours.

Total Annual Cost: N/A.

Needs and Uses: Under Section 1.929(c)(1) of the Commission's rules, any increase in the composite interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service, Rural Radiotelephone Service, or 800 MHz Specialized Mobile Radio Service is a major modification of license that requires prior Commission approval. However, the Commission released a Notice of Proposed Rulemaking (NPRM) in WT Docket No. 03-103 (68 FR 44003), proposing to amend this rule section to specify that expansion of a CIC of a site-based licensee in the Paging and Radiotelephone Service, as well as the Rural Radiotelephone Service and 800 MHz Specialized Mobile Radio Service, over water on a secondary, non-interference basis should be classified as a minor (rather than major) modification of a license. Such reclassification would eliminate the filing requirements associated with these license modifications, but require site-based licensees to provide the geographic area licensee (on the same frequency) with the technical and engineering information necessary to evaluate the site-based licensee's operations over water.

OMB Control No.: 3060-0465.

Needs and Uses: Section 74.985

requires signal booster stations to: (1) Submit engineering data or showings in specified formats to the FCC's duplicating contractor; (2) to serve a copy of the application and accompanying engineering materials on affected co-channel or adjacent channel parties; and (3) retain a copy of the application at the transmitter site. The data are used to ensure that MDS and ITFS applicants and licensees have considered the potential harmful interference from their facilities.
