**SUPPLEMENTARY INFORMATION:**

**A. Background**

By a submission dated May 22, 2001, the Environmental Working Group (EWG) and the Healthy Building Network (HBN) requested that the Commission enact a ban on use of chromated copper arsenate (CCA)-treated wood in playground equipment.<sup>1</sup> The submitters asserted that a ban is necessary because "[r]ecent research has shown that arsenic is more carcinogenic than previously recognized, that arsenic is present at significant concentrations on CCA-treated wood and in underlying soil, that the health risks posed by this wood are greater than previously recognized, and that past risk assessments were incomplete." On June 20, 2001, that request was docketed as petition HP 01-3 under the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261-1278.

The Commission solicited public comment on the petition by Federal Register notice of July 13, 2001. 66 FR 36756. Twenty-eight comments were received by the close of the comment period on September 11, 2001. The staff also held a public meeting on August 6, 2001 with members of the American Chemistry Council (representing CCA chemical manufacturers) and the American Wood Preservers Institute. On October 3, 2001, the staff conducted a public meeting with representatives of the petitioners. The comments from the

<sup>1</sup> The submission also contained a request that the commission review the safety of CCA-treated wood for general use. Such a review would not require rulemaking to implement. Therefore, that request was not docketed as a petition for rulemaking.
