BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-317 and 50-318]

Calvert Cliffs Nuclear Power Plant, Units Nos. 1 and 2; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-53 and DPR-69 issued to Calvert Cliffs Nuclear Power Plant, Inc. (the licensee) for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 located in Calvert County, Maryland.

The proposed amendments would extend the implementation date for Amendment Nos. 261 and 238 for Calvert Cliffs Units 1 and 2, respectively to July 1, 2004. The changes to the reactor pressure vessel pressure-temperature limit cooldown rates that were approved by Amendment Nos. 261 and 238 are more conservative than the plants existing rates and result in a longer cooldown period. The existing cooldown rates are acceptable through the end of 2004.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10

of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. involve a significant increase in the probability or consequences of an accident previously evaluated; or

The proposed amendment extends the implementation period specified in Item 3 of Amendment Nos. 261 and 238 from 120 days to July 1, 2004. Since the existing reactor pressure vessel pressure-temperature limit cooldown rates are valid through the end of 2004, there is no technical or safety issue associated with this request. The proposed amendment is purely administrative.

Therefore, the proposed change does not involve a significant increase in the probability or consequence of an accident previously evaluated

2. create the possibility of a new or different [kind] of accident from any accident previously evaluated; or

The proposed amendment extends the implementation period specified in Item 3 of Amendment Nos. 261 and 238 from 120 days to July 1, 2004. Since the existing reactor pressure vessel pressure-temperature limit cooldown rates are valid through the end of 2004, there is no technical or safety issue associated with this request. The proposed amendment is purely administrative.

This request does not involve a change in the operation of the plant and no new accident initiation mechanism is created by the proposed change. The proposed change does not involve a physical alteration of the plant.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. involve a significant reduction in a margin of safety.

The margin of safety is maintained during the period of extended implementation because the existing reactor pressure vessel pressure-temperature limit cooldown rates are valid through to end of 2004.

The proposed amendment extends the implementation period specified in Item 3 of Amendment Nos. 261 and 238 from 120 days to July 1, 2004. Since the existing reactor pressure vessel pressure-temperature limit cooldown rates are valid through the end of 2004, there is no technical or safety issue associated with this request. The proposed amendment is purely administrative.

Therefore, this proposed change does not significantly reduce [a] margin of safety.
