

22209–3939. Mr. King can be reached at King-Darrin@MSHA.Gov (Internet E-mail), (202) 693–9838 (voice), or (202) 693–9801 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Under the Mine Act and § 75.1702, coal mine operators are required to develop programs to prevent persons from carrying smoking materials, matches, or lighters underground and to prevent smoking in hazardous areas, such as in or around oil houses, explosives magazines, etc. The Mine Act and the standard further require that the mine operator submit the program plan to MSHA for approval. The purpose of the program is to insure that a fire or explosion hazard does not occur.

A cigarette lighter was found to be the cause of a mine explosion that took the lives of 13 men in December 1981 and there have been many other similar occurrences in the past. As recently as May 1994, a mine explosion resulted in two fatalities, serious injuries to other survivors and severe damage to the mine. MSHA's investigation determined that the explosion's most likely source of ignition was the open flame of a cigarette lighter or match.

II. Desired Focus of Comments

MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA Home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and "Federal Register Documents."

III. Current Actions

The mine operator uses the information to conduct the program. MSHA uses the information to determine the mine operator's compliance with the standard and that a program is developed and implemented to prevent smoking in hazardous areas.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Program to Prevent Smoking in Hazardous Areas.

OMB Number: 1219–0041.

Recordkeeping: While there is no specific requirement that records be maintained for more than three years, all underground coal mines must have an approved smoking materials search plan in effect during the entire time they are operating.

Frequency: On occasion.

Affected Public: Business or other for-profit.

Respondents: 184.

Estimated Time Per Respondent: .5 hours.

Total Burden Hours: 92 hours.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintaining): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 12th day of March, 2004.

David L. Meyer,

Director, Office of Administration and Management.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Health Standards for Diesel Particulates (Underground Coal)

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the

Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

DATES: Submit comments on or before May 18, 2004.

ADDRESSES: Send comments to, Darrin King, Chief, Records Management Branch, 1100 Wilson Boulevard, Room 2139, Arlington, VA 22209–3939. Commenters are encouraged to send their comments on computer disk, or via Internet E-mail to king.darrin@dol.gov. Mr. King can be reached at (202) 693–9838 (voice), or (202) 693–9801 (facsimile).

FOR FURTHER INFORMATION CONTACT: , Darrin King, Chief, Records Management Branch, U.S. Department of Labor, Mine Safety and Health Administration, Room 2139, 1100 Wilson Boulevard, Arlington, VA 22209–3939. Mr. King can be reached at king.darrin@dol.gov (202) 693–9838 (voice), or (202) 693–9801 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

The Mine Safety and Health Administration's (MSHA) standards and regulations for diesel particulate in underground coal mines serve to protect coal miners who work on and around diesel-powered equipment. The internal combustion engines that power diesel equipment expose miners to potential health risks from exposure to diesel exhaust emissions. These standards and regulations contain information collection requirements for underground coal mine operators.

II. Desired Focus of Comments

MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and "Federal Register Documents."

III. Current Actions

Currently, the Mine Safety and Health Administration is soliciting comments concerning the extension of the information collection requirements related to the 30 CFR § 75.1915/72.503, § 72.510, § 72.520, and as a result of § 72.500, diesel manufacturers affected under Part 7 or Part 36.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Diesel Particulate Matter Exposure of Underground Coal Miners.

OMB Number: 1219-0124.

Recordkeeping: The information gathered is required to be recorded, maintained for the period specified, and made accessible, upon request, to authorized representatives of the Secretary of Labor and miners' representatives. This may be done in a traditional manner by recording on paper, or electronically by computer.

Frequency: On occasion.

Affected Public: Business or other for-profit.

Respondents: 148.

Estimated Time Per Respondent: 4.8 hours annually.

Total Burden Hours: 708.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintaining): \$7,878.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 12th day of March, 2004.

David L. Meyer,

Director, Office of Administration and Management.

Commenters are encouraged to send their comments on a computer disk, or via Internet e-mail to king.darrin@dol.gov, along with an original printed copy. Mr. King can be reached at (202) 693-9838 (voice), or (703) 693-9801 (facsimile).

FOR FURTHER INFORMATION CONTACT: The proposed information collection request may be viewed on the Internet by accessing the MSHA Home page (<http://www.msha.gov>) and selecting Statutory and Regulatory Information then Paperwork Reduction Act submission (<http://www.msha.gov/regspwork.htm>), or by contacting Darrin King, Records Management Branch, U.S. Department of Labor, Mine Safety and Health Administration, Room 2139, 1100 Wilson Boulevard, Arlington, VA 22209-3939. Mr. King can be reached at king.darrin@dol.gov (Internet e-mail), (703) 693-9838 (voice), or (703) 693-9801 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Title 30 CFR 56.13015 and 57.13015 require that compressed-air receivers and other unfired pressure vessels be inspected by inspectors holding a valid National Board Commission and in

accordance with the applicable chapters of the National Board Inspection Code, a manual for Boiler and Pressure Vessels Inspectors, 1979.

Title 30 CFR 56.13030 and 57.13030 require that fired pressure vessels (boilers) be equipped with safety devices approved by the American Society of Mechanical Engineers (ASME) to protect against hazards from overpressure, flameouts, fuel interruptions and low water level. 56/57.13030 requires that records of inspections and repairs be retained by the mine operator in accordance with the requirements of the ASME Boiler and Pressure Vessel Code and the National Board Inspection Code (progressive records—no limit on retention time) and made available to the Secretary or his/her authorized representative.

Title 30 CFR 56.14100 and 57.14100 require equipment operators to inspect equipment, machinery, and tools that are to be used during a shift for safety defects before the equipment is placed in operation. Defects affecting safety are required to be corrected in a timely manner. In instances where the defect makes continued operation of the equipment unsafe, the standards require removal from service, tagging to identify that it is out of use, and repair before use is resumed.

Title 30 CFR 56.18002 and 57.18002 require that a competent person designated by the operator shall examine each working place at least once each shift for conditions which may adversely affect safety or health. A record that such examinations were conducted shall be kept by the operator for a period of one year, and shall be made available for review by the Secretary or his/her authorized representative.

II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Safety Defects, Examination, Correction, and Records. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
