#### Endangered and Threatened Wildlife and Plants; 90-Day Finding for a Petition to Delist the Preble's Meadow Jumping Mouse in Colorado and Wyoming and Initiation of a 5-Year Review

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of 90-day petition finding and initiation of status review for the 12-month finding and 5-year review.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce a 90-day finding on a petition to remove the Preble's Meadow Jumping Mouse (Preble's) (*Zapus hudsonius preblei*) from the Federal List of Threatened and Endangered Wildlife and Plants pursuant to the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et seq.*). We find that the petition and additional information in our files presents substantial information that delisting Preble's may be warranted and are initiating a status review. We are requesting submission of any new information on the Preble's since its original listing as an endangered species in 1998. Following this status review, we will issue a 12-month finding on the petition to delist. Because a status review is also required for the 5-year review of listed species under section 4(c)(2)(A) of the Act, we are electing to prepare these reviews simultaneously. At the conclusion of these simultaneous reviews, we will issue the 12-month finding on the petition, as provided in section 4(b)(3)(B) of the Act, and make the requisite finding under section 4(c)(2)(B) of the Act based on the results of the 5-year review.

**DATES:** The 90-day finding announced in this document was made on March 18, 2004. To be considered in the 12-month finding on this petition, comments and information must be submitted to us by June 1, 2004.

**ADDRESSES:** Questions or information concerning this petition should be sent to the Field Supervisor, Colorado Fish and Wildlife Office, Ecological Services, 755 Parfet Street, Suite 361, Lakewood, Colorado 80215. The separate petition

finding, supporting data, and comments are available for public review, by appointment, during normal business hours at the above address.

**FOR FURTHER INFORMATION CONTACT:** Ms. Susan Linner at 303-275-2370 (see ADDRESSES section).

#### SUPPLEMENTARY INFORMATION:

##### Background

Section 4(b)(3)(A) of the Act requires that we make a finding on whether a petition to list, delist, or reclassify a species presents substantial information to indicate that the petitioned action may be warranted. To the maximum extent practicable, this finding is to be made within 90 days of receipt of the petition, and the finding is to be published promptly in the **Federal Register**. If we find substantial information exists to support the petitioned action, we are required to promptly commence a review of the status of the species (50 CFR 424.14). "Substantial information" is defined in 50 CFR 424.14(b) as "that amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted." Petitioners need not prove that the petitioned action is warranted to support a "substantial" finding; instead, the key consideration in evaluating a petition for substantiality involves demonstration of the reliability and adequacy of the information supporting the action advocated by the petition.

When considering an action for listing, delisting, or reclassifying a species, we are required to determine whether a species is endangered or threatened based on one or more of the five listing factors as described at 50 CFR 424.11. Delisting may be warranted as a result of (1) extinction; (2) recovery; and/or (3) a determination that the original data used for classification of the species as endangered or threatened, were in error.

On May 13, 1998, we listed the Preble's meadow jumping mouse (Preble's) (*Zapus hudsonius preblei*) was listed as threatened under the Act (63 FR 26517). On June 23, 2003, we published the Final Rule to Designate Critical Habitat for the Preble's (68 FR 37275). We recently responded to a petition on December 18, 2003, in which we found that there was not substantial information to indicate that delisting may be warranted (68 FR 70523). Some of the most pertinent information available to the current petitioners, as discussed below in Review of Petitions, was not available to

the Service at the time of the December 18, 2003, finding.

#### Biology and Distribution

The Preble's is a small rodent in the family *Zapodidae* and is 1 of 12 recognized subspecies of the species *Zapus hudsonius*, the meadow jumping mouse. This largely nocturnal mouse is 20 to 23 centimeters (8 to 9 inches) long (its tail accounts for 60 percent of its length), with hind feet adapted for jumping. The large hind feet can be one-third again as large as those of other mice of similar size. The Preble's is found in both the North and South Platte River basins, generally, from the eastern flank of the Laramie Mountains in southeastern Wyoming, southward along the eastern flank of the Front Range of Colorado and into the Arkansas River basin (Long 1965; Hall 1981; Clark and Stromberg 1987; Fitzgerald et al. 1994; Clippinger 2002). Elevation appears to mark the western boundary of the Preble's distribution. The Preble's is generally found between approximately 1,400 meters (4,600 feet) and 2,300 meters (7,600 feet). Typical habitat for the Preble's comprises well-developed plains riparian vegetation with adjacent, undisturbed grassland communities and a nearby water source. Well-developed plains riparian vegetation typically includes a dense combination of grasses, forbs, and shrubs; a taller shrub and tree canopy may be present (Bakeman 1997). The species hibernates near these riparian zones, usually, from September or October to May (Shenk and Sivert 1999; Schorr 2001).

The Preble's is closely associated with riparian ecosystems that are relatively narrow and represent a small percentage of the landscape. The decline in the extent and quality of Preble's habitat is considered the main factor threatening the subspecies (63 FR 26517; Hafner et al. 1998, Shenk 1998). Habitat alteration, degradation, loss, and fragmentation resulting from urban development, flood control, water development, agriculture, and other human land uses have adversely impacted Preble's populations (68 FR 37275; Ryon 1996). Habitat destruction may harm individual Preble's directly or indirectly by destroying nest sites, food resources, and hibernation sites, by disrupting behavior, or by forming a barrier to movement. Additional background information is available in the May 13, 1998, Final Rule to List the Preble's as a Threatened Species (63 FR 26517) and the Final Rule to Designate Critical Habitat for the Preble's meadow jumping mouse (68 FR 37275).
