## DEPARTMENT OF STATE

[Public Notice 4678]

### Bureau of Educational and Cultural Affairs; Program Title: Global Connections and Exchange Program

**ACTION:** Request for grant proposals.

**SUMMARY:** The Youth Programs Division, Office of Citizen Exchanges, of the Bureau of Educational and Cultural Affairs announces an open competition for the Global Connections and Exchange program. Public and private non-profit organizations meeting the provisions described in Internal Revenue Code section 26 U.S.C. 501(c)(3) may submit proposals to administer the Global Connections and Exchange program in (1) Azerbaijan and/or (2) for other countries with significant Muslim populations. The Bureau's emphasis for Program (2) is on countries in the Middle East/North Africa, South Asia, East Asia, and sub-Saharan Africa. Countries in Europe and Eurasia (excluding Turkey) are not eligible. The Bureau will award one grant for the Azerbaijan program and one to three grants for the second program. The grantee organizations and/or their partners will select overseas schools and provide them with access to the Internet and related training to develop collaborative school partnerships with U.S. schools. Thematic online projects will enhance learning, research and cross-border communication among participating schools. All Global Connections and Exchange activities will be undertaken in regular and consistent consultation with the Public Affairs Section (PAS) of the U.S. Embassy in each participating country.

### Program Information

#### Overview

Global Connections and Exchange is designed to introduce youth to a broad range of ideas and resources while enhancing the use of information technology in schools. Through this program, overseas secondary schools will expand computer literacy skills, improve general education, and gain a deeper understanding of U.S. society, culture, and values. American students will in turn gain a greater understanding of foreign cultures. The goals of the program are:

- Provide access to information via the Internet that enhances general education.
- Improve educational tools, resources, and learning through the application of information technology, complementary teacher training, online resource development, school partnerships, and student collaboration.
- Prepare a cadre of students with the necessary skills to allow them to apply for other exchange and academic study opportunities in the U.S.
- Generate personal and institutional ties across borders among students, educators and their schools.
- Ensure the sustainability of information technology and Internet access in schools partnered under this grant.

Please refer to the POGI document for program specifics.

#### Guidelines

Applicants should identify specific objectives and measurable outcomes based on program goals and project specifications provided in the solicitation. Should organizations wish to apply for more than one program, they must submit a separate proposal for each. Each of the two programs will be judged independently. You MUST refer to the individual Project Objectives, Goals and Implementation (POGI) guidelines that are specific to each program.

*Program 1—Azerbaijan:* Total funding: \$460,000. ECA will award one grant. The grant period will be 12 months in duration. The grant is intended to build on a network of schools that have benefited from three years of Bureau grant-funding since 2001.

*Program 2—Countries with significant Muslim populations:* Total funding: \$1,600,000. This program is a continuation of a program started in 2002 and expanded in 2003. The program office encourages creative ideas and innovative approaches to connectivity and exchange. ECA may

award one grant for the whole amount or up to three grants for an amount of not less than \$500,000 each. Therefore, an organization may apply to conduct the entire program, or it may apply to work on a slightly smaller scale and request a commensurate grant amount. The intent is to provide a small number of grants to organizations working with a broad network of countries. The grant period will be 18 months in duration. Applicants should select the countries with which they plan to work and present a strong justification for their choices in their proposals.

For both programs, applicants must demonstrate their capacity for conducting programs of this nature. This includes administrative infrastructure in the geographic areas from which schools will be selected and resources to link the foreign schools with schools in the U.S. and other countries to facilitate substantive online programs.

The grants to be awarded under this competition will be based upon the quality and responsiveness of proposals to the review criteria presented later in this Request for Grant Proposals (RFGP). The grants should begin on or about August 1, 2004, subject to availability of funds. Sub-grant and consortium arrangements are possibilities.

The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Pending successful implementation of this program and the availability of funds in subsequent fiscal years, the Bureau reserves the right to renew this grant for two additional fiscal years, before competing it again.

#### Budget Guidelines

All organizations applying under this competition must demonstrate in their proposal narrative a minimum of four years experience managing and conducting international exchange programs. Bureau grant guidelines require that organizations with less than four years experience conducting and managing international exchanges be limited to \$60,000 in Bureau funding. Since the grant or grants awarded under the competition will exceed the \$60,000 ceiling, organizations with less than four years experience, per above, are not eligible to apply under this competition.

Applicants must submit a summary budget that includes all program components as well as breakdowns reflecting both administrative and program budgets. Applicants should provide separate sub-budgets for each program component, phase, location, or activity to provide clarification.
