SUPPLEMENTARY INFORMATION:**I. Abstract**

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), NOAA is responsible for management of the Nation's marine fisheries. In addition, NOAA must comply with the United States' obligations under the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971 *et seq.*). A Certificate of Eligibility (COE) for Billfishes is required under 50 CFR 635 to accompany all billfish, except for a billfish landed in a Pacific state and remaining in the state of landing. This documentation certifies that the accompanying billfish was not harvested from the Atlantic Ocean management unit (described on the form), and identifies the vessel landing the billfish, the vessel's home port, the

port of offloading, and the date of offloading. The certificate must accompany the billfish to any dealer or processor who subsequently receives or possesses the billfish. A standard form is not currently required to document the necessary information. However, NOAA is considering a proposed rule that would require a standard form, and its submission to NOAA after the final sale of the billfish. This collection is necessary to implement the Atlantic Billfish Fishery Management Plan, whose objective is to reserve Atlantic billfish for the recreational fishery.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Oceanic and Atmospheric Administration (NOAA) operates a program to implant archival tags in, or affix archival tags to, selected Atlantic Highly Migratory Species (tunas, sharks, swordfish, and billfish). Archival tags are miniature data loggers that acquire information about the movements and behavior of the fish. Persons catching tagged fish are exempted from other normally applicable regulations, such as immediate release of the fish, but must notify NOAA, return the archival tag or

make it available to NOAA personnel, and provide information about the location and method of capture. The information obtained is used by NOAA in the formation of international and domestic fisheries policy and regulations.

Persons outside of NOAA who affix or implant archival tags must obtain prior authorization from NOAA and submit subsequent reports about the tagging of fish. NOAA needs the information to evaluate the effectiveness of archival tag programs, to assess the likely impact of regulatory allowances for tag recovery, and to ensure that the research does not produce undue mortality.

II. Method of Collection

Catch notifications are provided a toll-free telephone number. Tags and associated information are mailed in (a reward is given for tag recoveries). Notifications and reports of archival tagging efforts are provided in written form, meeting requirements set forth in regulations.
