SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-49020; File No. SR-NASD-2003-143]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Granting Approval to a Proposed Rule Change and Amendments Nos. 1, 2, and 3 Thereto to Establish a New "Auto-Ex" Order in Nasdaq's SuperMontage System

January 5, 2004.

I. Introduction

On September 24, 2003, the National Association of Securities Dealers, Inc. ("NASD" or "Association") through its subsidiary, the Nasdaq Stock Market, Inc. ("Nasdaq"), filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² a proposed rule change to establish an "Auto-Ex" order in Nasdaq's National Market Execution System ("NNMS" or "SuperMontage"). Nasdaq filed Amendment Nos. 1 and 2 to the proposed rule change on October

3, 2003,³ and October 21, 2003,⁴ respectively. The proposed rule change, as amended, was published for comment in the **Federal Register** on October 28, 2003.⁵ The Commission received two comment letters on the proposal.⁶ In addition, Nasdaq submitted a response to comments.⁷ Nasdaq also submitted Amendment No. 3, to the proposed rule change on December 17, 2003.⁸ This order approves the proposed rule change, as amended.

II. Description of the Proposed Rule Change

Nasdaq proposes to establish an Auto-Ex order for use in SuperMontage. Auto-Ex orders may be either priced limit orders or market orders, and all market participants would be permitted to enter Auto-Ex orders. Auto-Ex orders would execute solely against the Quotes/Orders of SuperMontage participants that participate in the system's automatic execution functionality and do not charge a separate quote-access fee to participants accessing their Quotes/Orders through SuperMontage. Auto-Ex orders would access all available liquidity at multiple price levels, but under no circumstances would the order trade-through the Quote/Order of an Order-Delivery electronic communications network ("ECN") or an automatic execution participant that charged an access fee to access liquidity at another price level. Thus, an Auto-Ex order would automatically be designated "Immediate

or Cancel," and the order (or any unexecuted portion thereof) would be cancelled whenever the best price available through SuperMontage solely reflects the Quote/Order of a market participant that is not eligible to receive the Auto-Ex order.

Nasdaq intends to implement the Auto-Ex order as soon as possible following Commission approval, and will inform market participants of the exact implementation date via a Head Trader alert on <http://www.nasdaqtrader.com>.

III. Summary of Comments and Nasdaq's Response

As noted above, the Commission received two comment letters on the proposed rule change.⁹ Both commenters, Inet and Bloomberg, opposed the Commission's approval of the proposed rule change.

Inet and Bloomberg stated that the proposed rule change discriminates against ECNs by creating an order type that would bypass ECNs in favor of automatic execution participants. Both commenters questioned the primary rationale offered by Nasdaq in the Notice that the proposal would benefit market participants that seek speed and certainty of executions. For example, Inet noted that the Auto-Ex order would also bypass automatic execution participants that charged quote access fees, and questioned whether the true motivation of the proposal was to enhance speed of execution for market participants or provide for the systemic discrimination against ECNs in SuperMontage.¹⁰ Inet suggested that Nasdaq should establish criteria to differentiate between Order-Delivery ECNs that have consistently rapid order response times and those that have comparative slow order response times (on a regular or intermittent basis) by creating criteria under the proposal that would establish an acceptable ECN response time. Bloomberg also expressed doubts about Nasdaq's rationale because, in a race condition, a participant entering an order into SuperMontage may not have its order filled against an automatic execution participant if that participant's trading interest (bid or offer) was satisfied a split-second before.

In addition, both commenters stated that implementation of an Auto-Ex order would undercut the principles of price/time priority in SuperMontage. Further, Inet stated that Nasdaq's

⁸ See letter to Katherine A. England, Assistant Director, Division, Commission, from John M. Yetter, Associate General Counsel, Nasdaq, dated December 16, 2003 ("Amendment No. 3"). In Amendment No. 3, Nasdaq amended the proposed rule text to reflect the immediate effectiveness of SR-NASD-2003-150. See Securities Exchange Act Release No. 48798 (November 17, 2003) (Notice of Filing and Immediate Effectiveness of SR-NASD-2003-150). The Commission notes that this is a technical, non-substantive amendment and not subject to notice and comment.
