The vessel owner is required to fax or mail the Alaska VMS Activation Fax directly to Alaska Enforcement Division VMS, P.O. Box 21767, Juneau, AK 99802-1767, phone 907-586-7225, fax 907-586-7703.

The owner must confirm the TT-3022D-NMFS or TT-3026-NMFS operation and communications service to ensure that position reports are automatically sent to and received by OLE before leaving on their first fishing trip under VMS. OLE does not regard the fishing vessel as meeting the requirements until position reports are automatically received. For confirmation purposes, contact Alaska Enforcement Division VMS staff, phone 907-586-7225, fax 907-586-7703.

#### *B1. Telenor Satellite Services*

Inmarsat-C is a store-and-forward data messaging service, and allows users to send and receive information virtually anywhere in the world, on land, at sea, and in the air. Inmarsat-C supports a wide-variety of applications including Internet-based e-mail, position and weather reporting, a free daily news service, and remote equipment monitoring and control. Mariners can use Inmarsat-C free of charge to send critical safety at-sea messages as part of the U.S. Coast Guard's Automated Mutual-Assistance Vessel Rescue System and NOAA's Shipboard Environmental Acquisition System programs.

Telenor Vessel Monitoring System Services is being sold through LandSea Systems, Inc. For the LandSea and Telenor addresses, look in this notice under the heading VMS Provider Addresses.

#### *B2. Xantic*

Xantic is a provider of vessel monitoring services to the fishing industry. By installing an OLE-approved Inmarsat-C transceiver on the vessel, fishermen can send and receive e-mail, to and from land. The transceiver automatically sends vessel position reports to OLE, and is fully compliant with Coast Guard search and rescue centers. Xantic vessel monitoring system services are being sold through LandSea Systems, Inc. For the LandSea and Xantic addresses, look in this notice under the heading VMS Provider Addresses.

Telenor and Xantic products and services are offered through LandSea Systems who supports the security and privacy of vessel accounts and messages by requiring password authentication

for vessel owners or agents, and OLE personnel to prevent unauthorized changes or inquiries, and separating of private messages from OLE messages. (OLE currently requires VMS-related position reports, only.)

Billing is separated between accounts for the vessel owner and the OLE. VMS position reports and vessel-initiated messaging are paid by the vessel owner. Messaging initiated from OLE operations center is paid by NOAA.

LandSea Systems provides customer service for Telenor and Xantic users to support and establish two-way transmission of transceiver unit configuration commands between the transceiver and land-based control centers. This supports OLE's message needs and, optionally, fishermen's private message needs. A configuration option is available to automatically send position reports to a private e-mail address, such as a fleet management company.

#### *B3. Stratos*

Stratos provides all Inmarsat services globally and has extensive experience in the provision of Inmarsat-C messaging and tracking services. Stratos has distributors situated throughout the United States that can provide equipment, installation, commissioning and all other necessary services in compliance with NMFS requirements.

By installing an OLE approved Inmarsat-C transceiver on the vessel in accordance with vendor instructions and specifications and OLE requirements, fishermen can also easily send and receive e-mail, to and from land and can also setup individual crew member accounts onboard for e-mail to family and friends without billing to the vessel, but direct billing to crew member.

Vessel owners wishing to use Stratos, Telenor or Xantic services must purchase an Inmarsat-C transceiver approved for the fishery. The owner must complete an Inmarsat-C system use contract with Stratos, Telenor or Xantic, obtain a mobile earth station license (FCC requirement). The transceiver must be commissioned with Inmarsat according to Stratos, Telenor or Xantic's instructions. The owner should refer to and follow the configuration, installation, and service activation procedures for the specific transceiver purchased.
