**Community Mental Health Centers (CMHC) Construction Grantee Checklist**—(OMB No. 0930-0104, Extension, no change)—Recipients of Federal CMHC construction funds are obligated to use the constructed facilities to provide mental health services. This annual Checklist enables grantees to supply necessary information efficiently and with a minimum of burden. The following table summarizes the annual burden for this program.

	Annual respondents	Responses/ respondent	Hours per response	Annual burden

### Central Utah Project Completion Act

**AGENCY:** Department of the Interior, Office of the Assistant Secretary—Water and Science (Interior).

**ACTION:** Notice of intent to negotiate contracts and agreements among Interior, Central Utah Water Conservancy District (CUWCD), and other parties required to implement the Utah Lake Drainage Basin Water Delivery System as authorized in section 202(a)(1) of the Central Utah Project Completion Act (CUPCA), which is part of the Bonneville Unit of the Central Utah Project.

**SUMMARY:** On March 25, 2004, Interior, CUWCD, and the Utah Reclamation Mitigation and Conservation Commission filed a Draft Environmental Impact Statement (DEIS) for the Utah Lake Drainage Basin Water Delivery System (Utah Lake System), Bonneville

Unit, Central Utah Project with the Environmental Protection Agency and made the draft EIS available for public review and comment. The draft EIS identified several contracts and agreements among the involved parties required to implement the Utah Lake System.

**DATES:** Dates and locations for public negotiation sessions on the contracts and agreements will be announced in local newspapers.

**SUPPLEMENTARY INFORMATION:** The Utah Lake System is one of the systems of the Bonneville Unit of the Central Utah Project that would develop central Utah's water resources for municipal and industrial supply, fish and wildlife, and recreation. The Utah Lake System Preferred Alternative would provide an average transbasin diversion of 101,900 acre-feet which consists of 30,000 acre-feet of Municipal and Industrial (M&I) secondary water to southern Utah

County and 30,000 acre-feet of M&I water to Salt Lake County water treatment plants; 1,590 acre-feet of M&I water already contracted to southern Utah County cities, and 40,310 acre-feet of M&I water to Utah Lake for exchange to Jordanelle Reservoir. The Preferred Alternative is analyzed in the March 2004, Utah Lake System Draft Environmental Impact Statement and in the March 2004, Draft Supplement to the Bonneville Unit Definite Plan Report. Implementation of the Utah Lake System requires the execution of contracts and agreements among the parties involved with the project. The contracts and agreements to be publicly negotiated will include repayment, construction, funding, water petitions, Warren Act conveyance, water conservation, and other related documents.

*Information, Comments, and Inquiries:* Pursuant to the Reclamation Project Act of 1939, section 9(f), 43 U.S.C. 485h(f), interested parties may submit written data, views and arguments concerning the contracts and agreements to the address below. **SUPPLEMENTARY INFORMATION:** By Federal law (National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 [Refuge Administration Act] 16 U.S.C. 668dd-668ee), all lands within the National Wildlife Refuge System will be managed in accordance with an approved CCP by 2012. A CCP guides management decisions; and identifies refuge goals and long-range objectives and strategies for achieving the purposes for which a refuge was established. During the CCP planning process, many elements will be considered including: Wildlife and habitat management, public use opportunities, and cultural resource protection. Public input into the planning process is essential. The CCP for Umatilla and McNary NWRs will describe desired conditions for the refuges and how FWS will implement management strategies. The FWS will prepare an EA in accordance with procedures for implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370d).

Umatilla NWR encompasses 26,888 acres with units along the Columbia River in both Washington and Oregon. It was established in 1969 to mitigate wildlife habitat losses that occurred when the habitat was flooded after completion of the John Day Lock and Dam. A large portion of the Umatilla NWR is owned by the U.S. Army Corps of Engineers (USACE) and is managed by the FWS under Cooperative Agreement "for the conservation, maintenance, and management of wildlife resources thereof, and its habitat thereon."
