

divisions (MCDs), counties, federally recognized American Indian areas (AIAs, which include reservations and/or off-reservation trust lands), and Alaska Native Regional Corporations (ANRCs), the dissolution of incorporated municipalities and MCDs, and changes in the boundaries of municipalities, MCDs, counties, AIAs, and ANRCs. The BAS information is used to provide an appropriate record for reporting the results of the decennial and economic censuses; annual surveys to support the annual population estimates program, and the American Community Survey, to update the municipal, MCD, county, AIA, and ANRC inventory for compliance with responsibilities specified in the OMB Circular A-16 that supports the spatial data steward responsibilities of the OMB E-Gov Geospatial Onestop, the FGDC Subcommittee on Cultural and Demographic Data, The National Map, the Federal Information Processing Standards (FIPS) program, and to update the Geographic Names Information Systems (GNIS) all of which are managed or maintained by the U.S. Geological Survey (USGS).

The BAS universe and mailing materials vary depending on the needs of the Census Bureau in fulfilling the requirements of its censuses and household surveys and our partnerships. In the years ending in 8, 9, and 0, the survey includes all governmental counties and equivalent areas, all incorporated municipalities, all governmental MCDs, and all federally recognized American Indian and Alaska Native areas. Each governmental entity surveyed receives all maps covering its jurisdiction and one or more forms. These 3 years coincide with the Census Bureau's preparations for the decennial census.

In the years ending with 2, and 7, the BAS generally includes all governmental counties and their statistical equivalents, all MCDs in the six New England states and those MCDs with a population of 10,000 or greater in the states of Michigan, Minnesota, New Jersey, New York, Pennsylvania and Wisconsin, those incorporated places with a population of 2,500 or greater, and all federally recognized American Indian and Alaska Native areas.

In the remaining years of the decade, years ending in 1, 3, 4, 5, and 6, the BAS generally includes all governmental counties and their statistical equivalents, all MCDs in the six New England states, and those incorporated places with a population of 5,000 or greater.

As part of our partnerships developed with state and county governments, the

universe is modified with local knowledge to target those governments known to have changes and delete governments with no changes to minimize unnecessary burden.

SUPPLEMENTARY INFORMATION

I. Abstract

Each year the U.S. Census Bureau sends the school Enrollment Report, P-4 form, to the 30 state departments of education that do not publish enrollment data early enough in the year for us to use their published reports. Information requested includes fall public and nonpublic enrollment by grade for the state and counties. In six states we collect year-end enrollment. The U.S. Census Bureau uses school enrollment data in preparing estimates of state population. State population estimates are used by dozens of Federal agencies for allocating Federal program funds, as bases for rates of occurrences, and as input for Federal surveys. State and local governments, businesses, and the general public use state population estimates for planning and other information uses.

II. Method of Collection

The School Enrollment Report, P-4 form, is mailed each spring to approximately 30 state education agencies. We request fall public and nonpublic school enrollment by grade for the states and counties. Responses are returned and reviewed on a flow basis during the summer and early fall. Data collected will be used as input for the development of population estimates. The estimates are made in November, December, and January.
