Office of Nonproliferation Policy; Proposed Subsequent Arrangement

AGENCY: Department of Energy.

ACTION: Notice of subsequent arrangement.

SUMMARY: This notice has been issued under the authority of section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160). The Department is providing notice of a proposed "subsequent arrangement" under the Agreement for Cooperation Concerning Civil Uses of Atomic Energy between

the United States and Canada and Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States and the European Atomic Energy Community (EURATOM).

This subsequent arrangement concerns the retransfer of 813,600 kg of U.S.-origin natural uranium hexafluoride, 550,000 kg of which is uranium, from Cameco Corporation, Port Hope, Ontario, Canada, to Eurodif Production (Eurodif), Pierrelatte France. The material, which is now located at Cameco Corp., Port Hope, Ontario, will be transferred to Eurodif for enrichment. Upon completion of the enrichment, the material will be used at Electricite de France as reactor fuel. Cameco Corp. originally obtained the uranium hexafluoride under the UF6 Feed Component Implementation Contract.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, we have determined that this subsequent arrangement is not inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Title: National Survey of Successful Waste Disposal Programs in Rural Areas in the United States.

Abstract: Under a USEPA grant, the Research Foundation for Health and Environmental Effects (RFHEE) will conduct a survey of household waste disposal options. In conjunction with the Rural Community Assistance Program and the National Volunteer Fire Council, RFHEE will develop a targeted survey to find successful methods of household trash disposal in rural areas besides burning, which releases toxics chemicals into the environment. The Partners will conduct telephone interviews with state officials who have trash burning bans (25 states) or who are concerned about the issue. In addition, a sample of local officials, Soil and Water Conservation Districts, and local volunteer firefighters will be surveyed as well. The purpose of the survey is to find alternative, economically-feasible options for disposal. The results of the survey will be available to the public. This survey will not be used for any federal regulatory purposes. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The survey will be shared with approximately 100 respondents and is expected to take 20 minutes to complete. Participation is strictly voluntary and will be a one time occurrence. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
