Affected entities: Entities potentially affected by this action are manufacturers, importers, formulators and processors of substitutes for ozone-depleting substances.

Title: Significant New Alternatives Policy (SNAP) Program Final Rulemaking Under Title VI of the Clean Air Act Amendments of 1990.

Abstract: Information collected under this rulemaking is necessary to implement the requirements of the Significant New Alternatives Policy (SNAP) program for evaluating and regulating substitutes for ozone-depleting chemicals being phased out under the stratospheric ozone protection provisions of the Clean Air Act (CAA). Under CAA section 612, EPA is authorized to identify and restrict the use of substitutes for class I and class II ozone-depleting substances where EPA determines other alternatives exist that reduce overall risk to human health and

the environment. The SNAP program, based on information collected from the manufacturers, formulators, and/or sellers of such substitutes, identifies acceptable substitutes. Responses to the collection of information are mandatory under section 612 for anyone who sells or, in certain cases, uses substitutes for an ozone-depleting substance after April 18, 1994, the effective date of the final rule. Under CAA section 114(c), emissions information may not be claimed as confidential.

To develop the lists of acceptable and unacceptable substitutes, the Agency must assess and compare "overall risks to human health and the environment" posed by use of substitutes in the context of particular applications. EPA requires submission of information covering a wide range of health and environmental factors. These include intrinsic properties such as physical and chemical information, ozone depleting potential, global warming potential, toxicity, and flammability, and use-specific data such as substitute applications, process description, environmental release data, environmental fate and transport, and cost information. Once a completed submission has been received, a 90 day review period under the SNAP program will commence. Any substitute which is a new chemical must also be submitted to the Agency under the Premanufacture Notice program under the Toxic Substances Control Act (TSCA). Alternatives that will be used in pesticide formulations must be filed jointly with EPA's Office of Pesticide Programs and with SNAP.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: For persons filing a SNAP Information Notice or petition, the reporting burden is estimated to average 150 hours per year from each of approximately 14 submitters, with estimated labor costs of roughly \$8400 and average annualized startup costs of \$3153 for gathering information from each respondent. For persons filing a TSCA/SNAP Addendum, the reporting burden is estimated to average 46 hours per year from each of two submitters at a labor cost of \$2576 each. For persons filing a notification of test marketing activity, the reporting burden is estimated to average 2 hours per year from one submitter at a cost of \$112. For persons keeping records supporting use of a substitute subject to narrowed use limits, the recordkeeping burden is estimated to average 27 hours per year from approximately 250 users, at an average cost of \$1512 each. For persons keeping records of a small volume use, the recordkeeping burden is estimated to average 12 hours per year from each of approximately ten companies at an average cost of \$672 each. The total burden on respondents is estimated at 8972 hours per year at a cost of roughly \$547,000.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: June 1, 2004.

Director, Office of Atmospheric Programs.
