DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[INT-DES-04-3]

Platte River Recovery Implementation Program

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of the draft environmental impact statement.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969 (as amended), the Bureau of Reclamation (Reclamation) and the U.S. Fish and Wildlife Service (Service) as lead agencies have prepared a draft programmatic environmental impact statement (DEIS) for the Platte River Recovery Implementation Program (Program). This DEIS also serves as the Biological Assessment necessary for consultation under Section 7 of the Endangered Species Act (ESA). In 1997, the States of Nebraska, Wyoming, and Colorado and the U.S. Department of the Interior (Interior) signed a *Cooperative Agreement for Platte River Research and Other Efforts Relating to Endangered Species Habitats Along the Central Platte River, Nebraska (Cooperative Agreement)*. In this document, the signatories agreed to pursue a basinwide, cooperative approach to improve and maintain habitat for four threatened and endangered species—the whooping crane, interior least tern, piping plover, and pallid sturgeon

(target species) in the Platte River in Nebraska.

DATES: A 60-day public review period commences with the publication of this notice, or until April 2, whichever comes later. Public hearings on the DEIS will be held during the month of March. Times and locations will be announced in the **Federal Register** and local media.

ADDRESSES: Written comments on, or requests for copies of, the DEIS should be addressed to Platte River EIS Office (PL-100), PO Box 25007, Denver, Colorado, 80225-0007; telephone: (303) 445-2096, or by sending an email request to platte@prs.usbr.gov. The document is available on the Internet at <http://www.platteriver.org>. Copies of the DEIS are also available for public inspection at the locations listed under the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Reclamation and the Service have prepared this DEIS to analyze the impacts of the First Increment (13 years) of a proposed Program to benefit the target species and their habitat in the Platte River Basin and to provide compliance with the ESA for certain historic and future water uses in each State. The habitat objectives of the proposed Program include: improving flows in the Central Platte River through water re-regulation and conservation/supply projects; and protecting, restoring, and maintaining at least 10,000 acres of habitat in the Central Platte River area between Lexington and Chapman, Nebraska. The DEIS analyzes the impacts of four alternatives to implement the Program.

The programmatic DEIS focuses on impacts that the Program may have on hydrology, water quality, land, target species and their habitat, other species, hydropower, recreation, economics, and social and cultural resources. Subsequent NEPA and ESA documents required for implementation of specific Program actions will be tiered off of this document.
