

major stream systems. The Reserve provides critical habitat for several terrestrial and aquatic wildlife species including five species federally listed as threatened: Coho salmon, chinook salmon, steelhead trout, marbled murrelet (a threatened seabird) and the northern spotted owl.

The RMP presents management goals and direction for long-term management of the Reserve. The plan addresses future management actions at the land-use plan, program, and site level and analyzes the extent and magnitude of several types of actions, such as watershed restoration, forest restoration, and development of limited recreation facilities, including a trail system allowing public access.

The approved Headwaters Forest Reserve RMP consists of essentially the same array of selected alternatives that was identified in the Proposed Headwaters Forest Reserve RMP/Final Environmental Impact Statement (PRMP/FEIS), published in September 2003. BLM received 79 protests to the PRMP/FEIS. No inconsistencies with State or local plans, policies, or programs were identified during the Governor's consistency review of the PRMP/FEIS and no editorial

modifications were made in preparing the RMP/ROD.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Gulf of Mexico Outer Continental Shelf (OCS)

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of the availability of environmental documents prepared for OCS mineral proposals on the Gulf of Mexico (GOM) OCS.

SUMMARY: MMS in accordance with Federal Regulations that implement the National Environmental Policy Act (NEPA) announces the availability of NEPA-related Site-Specific Environmental Assessments (SEA) and Findings of No Significant Impact (FONSI), prepared by MMS for the following oil and gas activities proposed on the Gulf of Mexico OCS.

FOR FURTHER INFORMATION CONTACT: Public Information Unit, Information Services Section at the number below.

Minerals Management Service, Gulf of Mexico OCS Region, Attention: Public Information Office (MS 5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123-2394, or by calling 1-800-200-GULF.

SUPPLEMENTARY INFORMATION: MMS prepares SEAs and FONSI for proposals that relate to exploration for and the development/production of oil and gas resources on the GOM OCS. These SEAs examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. Environmental Assessments are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA Section 102(2)(C). A FONSI is prepared in those instances where MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the SEA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.

This listing includes all proposals for which the GOM OCS Region prepared a FONSI in the period subsequent to publication of the preceding notice.
