Title: Early Reading First National Evaluation.

Frequency: On Occasion.

Affected Public: Individuals or household; Businesses or other for-profit, Not-for-profit institutions.

Reporting and Recordkeeping Hour Burden:

Responses: 5,685.

Burden Hours: 2,256.

Abstract: The proposed data collection is necessary to complete the national evaluation of Early Reading First. The ERF national evaluation will use a regression discontinuity design, including a baseline and two follow-up assessment points, to determine the extent to which the additional funds and technical assistance given to ERF grantees change the instructional content and children's outcomes compared to the content and outcomes in the absence of ERF. The evaluation will also explore the extent to which variations in program quality and implementation are associated with differences in participant outcomes. The respondents for this research initiative include children, parents, teachers and preschool directors. The evaluation results will be used by policymakers to document ERF's effectiveness, understand best practices, and inform decisions about expansion.
