Postponement of Preliminary Determinations of Antidumping Duty Investigations: Certain Circular Welded Carbon Quality Line Pipe from Mexico and the Republic of Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is postponing the preliminary determinations in the antidumping duty investigations of certain circular carbon quality line pipe from Mexico and the Republic of Korea until no later than September 29, 2004. This postponement is made pursuant to section 733(c)(1)(B) of the Tariff Act of 1930, as amended (the Act).

EFFECTIVE DATE: July 27, 2004.

FOR FURTHER INFORMATION CONTACT: John Drury (Mexico) or Brandon Farlander (Korea), at (202) 482-0195 or (202) 482-0195, respectively, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On March 23, 2004, the Department initiated antidumping duty investigations of imports of certain

circular welded carbon quality line pipe from Mexico, the Republic of Korea (Korea), and the People's Republic of China (China). *See Notice of Initiation of Antidumping Duty Investigations: Certain Circular Welded Carbon Quality Line Pipe from Mexico, the Republic of Korea, and the People's Republic of China*, 69 FR 16521 (March 30, 2004). Section 733(b) of the Act requires the Department to make a preliminary determination no later than 140 days after the date of initiation. The preliminary determinations in these investigations are currently due not later than August 10, 2004.

Postponement of Preliminary Determinations

Under section 733(c)(1)(B) of the Act, the Department can extend the period for reaching a preliminary determination until not later than the 190th day after the date on which the administering authority initiates an investigation if the administering authority concludes that the parties concerned are cooperating and determines that: (i) the case is extraordinarily complicated by reason of (I) the number and complexity of the transactions to be investigated or adjustments to be considered; (II) the novelty of the issues presented; or (III) the number of firms whose activities must be investigated; and (ii) additional time is necessary to make the preliminary determination.

The parties concerned are cooperating in these investigations. Additional time is necessary, however, to complete the preliminary determinations for Mexico and Korea due to

(1) the number and complexity of the transactions to be investigated and adjustments to be considered, and (2) certain affiliation issues.

Moreover, with respect to the Mexican and both Korean respondents, on July 9, 2004, the Department received from American Steel Pipe Division of ACIPC, IPSCO Tubulars Inc., Lone Star Steel Company, Maverick Tube Corporation, Northwest Pipe Company, and Stupp Corporation, petitioners in these investigations, company-specific allegations that sales were made below the cost of production during the period of investigation. We are currently reviewing these allegations. Therefore, for both investigations, additional time is required to review the issues and the cost information for purposes of the preliminary determinations.

For the reasons identified above, we are postponing the preliminary determinations under Section 733(c)(1)(A) of the Act by 50 days, to no

later than September 29, 2004. The deadline for the final determinations will continue to be 75 days after the date of the preliminary determinations. This notice is issued and published pursuant to sections 733(f) and 777(i) of the Act.

Dated: July 21, 2004.

Acting Assistant Secretary for Import Administration.

Blackburn Drive, Gloucester, MA 01930 (or via the Internet at david.gouveia@noaa.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

Federal regulations at 50 CFR 229.34 limit the number of nets that can be used in certain fisheries in the mid-Atlantic that appear to be most closely linked with accidental catch of harbor porpoises. The fishermen in these fisheries must obtain and attach numbered tags for their nets. Because the number of tags per vessel is capped, the tagging program helps to limit the number of nets in use and helps NOAA identify the number in use.

II. Method of Collection

Requests for tags are submitted to NOAA on a paper form.

III. Data

OMB Number: 0648-0357.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations, individuals or households.

Estimated Number of Respondents: 25.

Estimated Time Per Response: 1 minute to attach a tag to a net and 2 minutes to request tags.

Estimated Total Annual Burden Hours: 22.

Estimated Total Annual Cost to Public: \$400.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.
