

prompted by several reports of failure of the auxiliary hydraulic pump systems. The requirements of that AD are intended to prevent failure of the electric motors of the hydraulic pump and associated wiring, which could result in fire at the auxiliary hydraulic pump and consequent damage to the adjacent electrical equipment and/or structure.

The repetitive inspections required by AD 2004-05-20 and proposed in NPRM, Docket 2003-NM-119-AD, are identical to those in AD 2001-14-08, but at different intervals. Accomplishment of the modification and the 2,500 flight-hour inspections requirements of AD 2004-05-20 adequately addresses the identified unsafe condition.

FAA's Determination

Upon further consideration, we have determined that we need to rescind AD 2001-14-08 to prevent operators from performing duplicate actions.

Since this action rescinds a requirement to perform a duplicate action, it has no adverse economic impact and imposes no additional burden on any person. Therefore, providing notice and opportunity for public comment is unnecessary before this AD is issued, and this AD may be made effective in less than 30 days after it is published in the **Federal Register**.

Other Relevant Rulemaking

For the reasons discussed previously, we are also planning to withdraw NPRM, Docket 2003-NM-119-AD, in a separate rulemaking action.

National Emission Standards for Hazardous Air Pollutants: Solvent Extraction for Vegetable Oil Production

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule; amendments.

SUMMARY: On April 12, 2001, the EPA issued national emission standards for hazardous air pollutants for solvent extraction for vegetable oil production (Vegetable Oil Production NESHAP) under section 112 of the Clean Air Act (CAA). This action will amend the compliance requirements for vegetable oil production processes that exclusively use a qualifying low-hazardous air pollutants (HAP) extraction solvent. The amendments are being made to require only the necessary recordkeeping and reporting requirements for facilities using the low-HAP extraction solvent compliance option. We are making the amendments by direct final rule, without prior proposal, because we view the revisions as noncontroversial and anticipate no adverse comments.

DATES: The direct final rule is effective on November 1, 2004 without further notice, unless EPA receives adverse written comment by October 1, 2004 or if a public hearing is requested by September 13, 2004. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** indicating which provisions will become effective and

which provisions are being withdrawn due to adverse comment.
