Title: NSPS for Rubber Tire Manufacturing (40 CFR part 60, subpart BBB) (Renewal).

Abstract: The New Source Performance Standards (NSPS) subpart BBB applies to affected facilities in rubber tire manufacturing plants that commence construction, modification or reconstruction after January 20, 1983. The affected facilities include: Each undertread cementing operation, each sidewall cementing operation, each tread end cementing operation, each bead cementing operation, each green tire spraying operation, each Michelin-A operation, each Michelin-B operation, each Michelin-C automatic operation. The rule establishes standards for volatile organic compounds (VOCs) use and emission limits.

Monitoring, recordkeeping and reporting requirements allow the regulatory agencies to determine compliance with the standard. One-time-only reports are required to identify the affected facilities and the compliance method used. Notification of Method 25 performance is also

required. Annual reports of Method 24 results to verify VOC content of water-based sprays would be required.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 167 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of rubber tire manufacturing plants.

Estimated Number of Respondents: 41.

Frequency of Response: Annually, semiannually, initially.

Estimated Total Annual Hour Burden: 13,323 hours.

Estimated Total Annual Costs: \$866,093, which includes \$0 annualized capital/startup costs, \$16,000 annual O&M costs, and \$850,093 annual labor costs.

Changes in the Estimates: There is an increase in 172 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The reason for the change is due to the inclusion of managerial and clerical person-hours. The active ICR only covered technical burden hours.

The increase in labor cost from the most recently approved ICR is due to a revised hourly labor rate from the United States Department of Labor.

Dated: September 5, 2004.

Oscar Morales,

Director, Collection Strategies Division.
