BILLING CODE 7536-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-335 and 50-389]

Florida Power and Light Company; Notice of Consideration of Issuance of Amendments to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Renewed Facility Operating License Nos. DPR-67 and NPF-16 issued to Florida Power and Light Company for operation of the St. Lucie Plant, Unit

Nos. 1 and 2, located in St. Lucie County, Florida.

The proposed amendments would allow the licensee to revise the St. Lucie Units 1 and 2 Technical Specifications to eliminate certain pressure sensor response time testing (RTT) requirements, as discussed in the Combustion Engineering Owners Group (CEOG) Topical Report NPSD-1167, Revision 2, "Elimination of Pressure Sensor Response Time Testing Requirements," which was approved by the NRC staff by letters dated July 24, 2000, and December 5, 2000. Specifically, these amendments revise the St. Lucie Units 1 and 2 Technical Specification Definitions 1.12, "Engineered Safety Features Response Time," and 1.26, "Reactor Protection System Response Time."

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment requests involve no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Operation of the facility in accordance with the proposed amendments would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes allow the elimination of pressure sensor response time testing. Response time testing is not an initiator of any accident previously evaluated. Consequently, the probability of an accident previously evaluated is not significantly increased. The allocated pressure sensor response times allowed in lieu of measurement have been determined to adequately represent the response time of the components such that the safety systems utilizing those components will continue to perform their accident mitigation function as assumed in the safety analysis. Therefore, the consequences of an accident previously evaluated are not significantly increased by this change. Therefore, this change does not
