[Docket No. AD04-10-000]

Enhanced Reporting of Natural Gas Storage Inventory Information; Technical Conference and Agenda

September 17, 2004.

As announced on August 2, 2004, the Federal Energy Regulatory Commission (Commission) will hold a technical conference on September 28, 2004 at 9:30 a.m. (e.s.t.) in the Commission Meeting Room at the Commission's headquarters, 888 First Street, NE., Washington, DC.

The conference is intended to explore whether the Commission should institute a generic rulemaking to require interstate natural gas pipeline companies and other owners and operators of natural gas storage facilities to electronically post each day actual natural gas storage inventory levels on their systems for the preceding day. Specifically, the technical conference will look into the feasibility, usefulness and appropriateness of requiring posting on a standardized basis for the previous gas day: (1) Net aggregate actual injection or withdrawal data; (2) actual total available working gas; and (3) actual total storage inventory volume. The Commission's staff will conduct the conference and members of the Commission and guest Commissioners may attend.

Agenda for the Conference

William Hederman, Director, Office of Market Oversight & Investigations
Opening Remarks 9:30 to 9:35 a.m.

John Kroeger, OMOI, Division of Enforcement

Process, Costs and Benefits

Discussion of the feasibility, usefulness and appropriateness of posting on a standardized basis for the previous gas day: (1) Net aggregate actual injection or withdrawal data; (2)

actual total available working gas; and (3) actual total storage inventory volume. Speakers will discuss costs of daily reporting, how the accuracy of reporting can be assured, and how corrections or adjustments to reported activity would be made. Speakers will also discuss the value of daily reporting and the benefits that pipeline customers and gas traders might receive from enhanced and timelier reporting.

- Anne Bomar, Managing Director of Rates, Dominion Transmission Inc.

- Jeff Keck, Manager of Operations Control, ANR.

- Arthur Corbin, President & General Manager, Municipal Gas Authority of Georgia (on behalf of American Public Gas Association).

Speakers are asked to address the same issues addressed by members of Panel 1. In addition, speakers are requested to address concerns triggered by the prospect of enhanced reporting that may be germane to the often differing obligations and business purposes of intrastate pipelines and local distribution companies relative to interstate pipeline companies. These concerns may include gas purchase activities and the legal authority of the Commission to impose enhanced reporting requirements on intrastate pipelines and local distribution companies that provide service pursuant to subpart C of part 284 of the Commission's regulations.

- Rick Daniel, President, EnCana Gas Storage.
