Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden. Emergency Clearance for the data set was published in the **Federal Register** on September 3, 2004 [Vol. 69, No. 171]. Federal agencies and grant applicants will use the standard data set and definitions for paper and electronic research grants applications. The standard data set will become the common Federal data set for research grant applications, replacing numerous agency data sets and reducing the administrative burden placed on the research grants community. The data set provides information to assist Federal program staff and grants officials in assessing the adequacy of applicant's proposals to accomplish project objectives and determine whether the business aspects of grants applications reflect program needs and grants policies. Federal agencies will not be required to collect all of the information included in the proposed data set. The agency will identify the data that must be provided by applicants through instructions that will accompany the application forms.
