SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0788.

Title: DTV Showings/Interference Agreements.

Form Number: FCC Form 301 and FCC Form 340.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; and Not-for-profit institutions.

Number of Respondents: 300.

Estimated Time per Response: 5 hours.

Frequency of Response: On occasion reporting requirement; and Third party disclosure.

Total Annual Burden: 1,500 hours.

Total Annual Cost: \$2,400,000.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: Section III-D of the FCC Form 301 and Section VII of the FCC Form 340 begin with a "Certification Checklist." This checklist contains a series of questions by which applicants may certify compliance with key processing requirements. The first certification requires conformance with the DTV Table of Allotments. The Commission allows flexibility for DTV facilities to be constructed at locations within five kilometers of the reference allotment sites without consideration of additional interference to analog or DTV service, provided the DTV service does not exceed the allotment reference height above average terrain or effective radiated power. In order for the Commission to process applications that cannot certify affirmatively, 47 CFR

Section 73.623(c) requires applicants to submit a technical showing to establish that their proposed facilities will not result in additional interference to TV broadcast and DTV operations.

Additionally, the Commission permits broadcasters to agree to proposed DTV facilities that do not conform to the initial allotment parameters, even though they might be affected by potential new interference. The Commission will consider granting applications on the basis of interference agreements if it finds that such grants will serve the public interest. These agreements must be signed by all parties to the agreement. In addition, the Commission needs the following information to enable such public interest determinations: A list of parties predicted to receive additional interference from the proposed facility, a showing as to why a grant based on the agreements would serve the public interest, and technical studies depicting the additional interference.

In 2001, the Commission removed from this collection all references to industry frequency coordination committees. These committees did not evolve. Respondents have been using consulting engineers and attorneys to prepare the technical showings and interference agreements.

OMB Control Number: 3060-0685.

Title: Annual Updating of Maximum Permitted Rates for Regulated Cable Services, FCC Form 1240.

Total Annual Burden: 30,000 hours.

The Commission authored the Form 1240 to enable local franchising authorities to adjudicate permitted rates for regulated cable rates, services, and equipment; for the addition and/or deletion of channels; and for allowance for pass through of external costs due to inflation.
