The CASAC, comprised of seven members appointed by the Administrator, was established under section 109(d)(2) of the Clean Air Act (CAA or "Act") (42 U.S.C. 7409) as an independent scientific advisory committee, in part to provide advice, information and recommendations on the scientific and technical aspects of issues related to air quality criteria and National Ambient Air Quality Standards (NAAQS) under sections 108 and 109 of the Act. The CASAC, which is administratively located under the EPA Science Advisory Board Staff Office, is a Federal advisory committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. The CASAC PM Review Panel consists of the CASAC, supplemented by expert consultants. The CASAC PM Review Panel will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

The CASAC PM Review Panel is charged in part with providing advice, information and recommendations on the scientific and technical aspects of issues related to air quality criteria and NAAQS for particulate matter. The February 3, 2004 teleconference is a follow-on to the CASAC PM Review Panel's review of the EPA Air Quality Criteria Document for Particulate Matter (Fourth External Review Draft), which took place in a public meeting held in Research Triangle Park on August 25–26, 2003 (68 FR 47060, August 7, 2003); and which was continued during a public teleconference held on October 3, 2003 (68 FR 53734, September 12, 2003); and a public meeting which took place in Research Triangle Park on November 12–13, 2003 (68 FR 60363, October 22, 2003). More information regarding this review can be found at the SAB Web site at <http://www.epa.gov/sab/pdf/casac104002.pdf>.

II. EUP

EPA has issued the following EUPs:
68467–EUP–7. Issuance. Mycogen Seeds c/o Dow AgroSciences LLC, 9330 Zionsville Road, Indianapolis, IN

46268–1054. This EUP allows the use of the plant-incorporated protectant *Bacillus thuringiensis* Cry34/35Ab1 proteins and the genetic material necessary for their production (from the insert of plasmid PHP17662) in corn on 624 acres of field corn to conduct insect resistance management, maize agronomic observation, maize breeding and observation nursery, maize demonstration, maize efficacy, maize hybrid production plots, maize regulatory field studies, non-target organism, and herbicide tolerance trials. The program is authorized only in the States of California, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Texas, Wisconsin, and the Commonwealth of Puerto Rico. The EUP is effective from June 24, 2003 to May 1, 2004.

29964–EUP–5. Issuance. Pioneer Hi-Bred International, Inc., P.O. Box 552, Johnston, Iowa 50131–0552. This EUP allows the use of the plant-incorporated protectant *Bacillus thuringiensis* Cry34/35Ab1 proteins and the genetic material necessary for their production (from the insert of plasmid PHP17662) in corn on 624 acres of field corn to conduct insect resistance management, maize agronomic observation, maize breeding and observation nursery, maize demonstration, maize efficacy, maize hybrid production plots, maize regulatory field studies, non-target organism, and herbicide tolerance trials. The program is authorized only in the States of California, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Texas, Wisconsin, and the Commonwealth of Puerto Rico. The EUP is effective from June 24, 2003 to May 1, 2004.

A tolerance has been established for residues of *Bacillus thuringiensis* Cry34Ab1 and Cry35Ab1 proteins and the genetic material necessary for their production in corn when used as plant-incorporated protectants in the food and feed commodities of field corn, sweet corn, and popcorn.

The **Federal Register** document announcing receipt of these and other Cry34/35Ab1 EUPs (68 FR 12073) (FRL–7286–3) received 42 comments, with 4 of these being received after the comment due date. Thirty commentors were in favor of EPA granting the EUPs. Twelve commentors urged the Agency not to approve them. Commentors included farmers and other private citizens, medium to smaller seed

companies, the American Soybean Association, and the environmental groups Hawaii Genetic Engineering Action Network and Earthjustice.

Commentors in favor of EPA granting the EUPs cited the reduced use of conventional insecticides, insect resistant management benefits, a lack of antibiotic resistance marker proteins in the Cry34/35Ab1 corn products, the need for competition in the marketplace for rootworm resistant corn, and the need to test the products this season. Commentors against EPA's granting of the permits cited that there was no tolerance exemption for Cry34/35Ab1, allergen and toxin concerns, concerns regarding adequate containment, and concerns regarding EPA enforcement.

First, EPA has, in fact, granted a temporary exemption from the requirement of a tolerance for *Bacillus thuringiensis* Cry34Ab1 and Cry35Ab1 proteins and the genetic material necessary for their production in corn, 40 CFR 180.1242 (68 FR 40178) (FRL–7310–1). In doing so, EPA concluded that there was a reasonable certainty that no harm will result from aggregate exposure to the U.S. population, including infants and children, to the Cry34Ab1 and Cry35Ab1 proteins and the genetic material necessary for their production. In addition, although the subject EUPs have a temporary tolerance exemption associated with them and under this condition EPA would not normally require such containment, both Dow and Pioneer's experimental programs require containment consisting of border rows; (distance isolation of 660 ft., or reproductive isolation, or temporal isolation); as well as having seed produced reserved for experimental work or future plantings. Finally, EPA's regional offices currently cooperate with State agencies in the enforcement of plant-incorporated protectant EUPs.
