^{*}The ATR interview will be administered every 2 months beginning at 30 days. It is assumed that those who are discharged at 30 days or less will receive an intake and discharge interview only and are included in the number in the first two rows. The number of respondents who are still in treatment by month is based on experience with CSAT's GPRA services data.
† Clients.

Send comments to Summer King, SAMHSA Reports Clearance Officer, Room 7–1045, 1 Choke Cherry Road, Rockville, MD 20850. Written comments should be received by January 18, 2005.

Patricia S. Bransford,

Acting Executive Officer, SAMHSA.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Statement of Organization, Functions, and Delegations of Authority

Part M of the Substance Abuse and Mental Health Services Administration (SAMHSA) Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services at 69 FR 60891, is amended to reflect the new functional statement for the Office of Program Services (OPS) and the Division of Operational Support (DOS). This amendment reflects the decision that the Most Efficient Organization (MEO) that is being established as a result of SAMHSA's FY 2004 competitive sourcing study will be located within DOS/OPS. In addition, this amendment reflects the Office of the Secretary's decision to consolidate responsibility for administration of the Small and Disadvantaged Business Utilization (SADBU) program within a single office

at the Department level. Hence, reference to the SADBU function has been deleted from the DOS functional statement. The changes are as follows:

Section M.20, Functions is amended as follows:

(A) The functional statements for the Office of Program Services (OPS) and the Division of Operational Support (DOS) within OPS is replaced with the following:

Office of Program Services (MB)

(1) Works in partnership with other SAMHSA and HHS components in managing, providing leadership, and ensuring SAMHSA's needs are met in the following service areas: Grant and contract application review, grants and contracts management, administrative services, human resources management, equal employment opportunity, organizational development and analysis, and information technology; (2) provides leadership in the development of policies for and the analysis, performance measurement, and improvement of SAMHSA administrative and management systems; (3) provides leadership, guidance, and technical expertise for the Agency's information technology program; (4) provides centralized administrative services for the Agency; (5) provides centralized staff assistance and office automation services for designated components of the Agency, and (6) conducts all aspects of the SAMHSA grants and contracts management process.

Division of Operational Support (MBH)

(1) Provides centralized administrative services for the Agency, including processing and coordinating requests for and providing advice on procurement actions, travel, property, facilities, and other activities; (2) coordinates actions as necessary with other HHS components such as the Program Support Center (PSC) procurement staff and the contract travel agency; (3) processes and coordinates requests for SAMHSA administrative actions; (4) provides advice and guidance to staff on administrative procedures for processing actions such as travel orders, acquisition requests, and training documents; (5) ensures administrative actions are consistent with regulations and other requirements, and implements general management policies as prescribed by SAMHSA and higher authorities; (6) coordinates the provision of support in the areas of real and personal property, building management, facility management, health and safety, security, transportation, parking, and telecommunications; (7) in collaboration with the Division of Financial Management in the Office of Policy, Planning, and Budget, performs budget execution tasks such as certifying funds, maintaining the commitment database, and reconciling accounts for program management for SAMHSA; (8) coordinates and complies with policies and procedures set forth by the Division of Financial Management for budget execution, and (9) provides centralized

staff assistance and office automation services for designated components of the agency.

Section M.40, Delegations of Authority. All delegations and redelegations of authority to officers and employees of SAMHSA which were in effect immediately prior to the effective date of this reorganization shall continue in effect pending further redelegations, providing they are consistent with the reorganization.

These organizational changes are effective November 3, 2004.

Charles G. Curie.

Administrator.

Draft Recovery Plan for Vernal Pool Ecosystems of California and Southern Oregon

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of document availability for review and comment.

SUMMARY: The U.S. Fish and Wildlife Service (we) announces the availability of the Draft Recovery Plan for Vernal Pool Ecosystems of California and Southern Oregon for public review and comment. This draft recovery plan covers 33 species, of which 20 are federally listed as threatened or endangered. These species inhabit vernal pool ecosystems in California and southern Oregon. This draft recovery plan includes recovery criteria and measures for 20 federally listed species. Federally endangered plants include Eryngium constancei (Loch Lomond button-celery), Lasthenia conjugens (Contra Costa goldfields), Limnanthes floccosa ssp. californica (Butte County meadowfoam), Navarretia leucocephala ssp. pauciflora (fewflowered navarretia), Navarretia leucocephala ssp. plieantha (manyflowered navarretia), Orcuttia pilosa (hairy Orcutt grass), Orcuttia viscida (Sacramento Orcutt grass), Parvisedum leiocarpum (Lake County stonecrop), Tuctoria greenei (Greene's tuctoria), and Tuctoria mucronata (Solano grass). Federally threatened plants include Castilleja campestris ssp. succulenta (fleshy owl's clover), Chamaesyce hooveri (Hoover's spurge), Neostapfia colusana (Colusa grass), Orcuttia inaequalis (San Joaquin Valley Orcutt grass), and Orcuttia tenuis (slender Orcutt grass). Federally endangered

animals include the Conservancy fairy shrimp (Branchinecta conservatio), longhorn fairy shrimp (Branchinecta longiantenna), and vernal pool tadpole shrimp (Lepidurus packardi). Federally threatened animals include the vernal pool fairy shrimp (Branchinecta lynchi) and delta green ground beetle (Elaphrus viridis). The portions of the plan dealing with the delta green ground beetle and Solano grass are a revision of the 1985 Delta Green Ground Beetle and Solano Grass Recovery Plan.

The draft recovery plan addresses conservation of 10 plant species of concern, including Astragalus tener var. ferrisiae (Ferris' milk vetch), Astragalus tener var. tener (alkali milk vetch), Atriplex persistens (persistent-fruited saltscale), Eryngium spinosepalum (spiny-sepaled button-celery), Gratiola heterosepala (Boggs Lake hedgehyssop), Juncus leiospermus var. ahartii (Ahart's dwarf rush), Legenere limosa (legenere), Myosurus minimus var. apus (little mouse tail), Navarretia myersii ssp. deminuta (pincushion navarretia), and Plagiobothrys hystriculus (bearded popcorn flower). The three animal species of concern addressed in the draft recovery plan include the midvalley fairy shrimp (*Branchinecta* mesovallensis), California fairy shrimp (Linderiella occidentalis), and western spadefoot toad (Spea hammondii).

DATES: Comments on the draft recovery plan must be received on or before March 18, 2005.

ADDRESSES: A copy of the draft recovery plan is available for review, by appointment, during normal business hours at the following U.S. Fish and Wildlife Service locations: Sacramento Fish and Wildlife Office, 2800 Cottage Way, Room W-2605, Sacramento, California (telephone (916) 414-6600); Carlsbad Fish and Wildlife Office, 6010 Hidden Valley Road, Carlsbad, California (telephone (760) 431-9440); Ventura Fish and Wildlife Office, 2493 Portola Road, Suite B, Ventura, California (telephone (805) 644–1766); Southwest Oregon Field Office, 2900 NW., Stewart Parkway, Roseburg, Oregon (telephone (541) 957-3473); and Arcata Fish and Wildlife Office, 1655 Heindon Road, Arcata, California (telephone (707) 822-7201. An electronic copy of this draft recovery plan is also available on the World Wide Web at http://pacific.fws.gov/ ecoservices/endangered/recovery/ plans.html and http:// endangered.fws.gov/recovery/ index.html#plans. Printed copies of the draft recovery plan will be available for distribution in 4 to 6 weeks.

FOR FURTHER INFORMATION CONTACT:

Harry McQuillen or Betty Warne, Fish and Wildlife Biologists, at the above Sacramento address.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. To help guide the recovery effort, we are working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. We will consider all information presented during the public comment period prior to approval of each new or revised recovery plan. Substantive technical comments will result in changes to the plan as appropriate. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individual responses to comments will not be provided.

The 33 species covered in this draft recovery plan occur primarily in vernal pool, swale, or ephemeral freshwater habitats within California and southern Oregon and are largely confined to a limited area by topographic constraints, soil types, and climatic conditions. Surrounding (or associated) upland habitat is critical to the proper ecological function of these vernal pool habitats. Most of the vernal pool plants and animals addressed in the draft recovery plan have life histories adapted to the short period for growth and reproduction within inundated or drying pools interspersed with long dormant periods when pools are dry, and extreme year-to-year variation in rainfall. Threats to the species include habitat loss, fragmentation, and
