Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236 as detailed below.

[Docket No. FRA-2004-19604]

*Applicant:* Norfolk Southern Corporation, Mr. Brian L. Sykes, Chief Engineer, C&S Engineering, 99 Spring Street, SW., Atlanta, Georgia 30303.

Norfolk Southern Corporation seeks relief from the requirements of Part 236, Section 236.566, of the Rules, Standard and Instructions, to the extent that NS be permitted to operate non-equipped locomotives in automatic cab signal territory, on the single main track and controlled siding of the Morrisville Line, between CP-King, milepost MV-30.1, near Earnest, Pennsylvania, and CP-Plymouth, milepost MV-28.2, near Fort Hill, Pennsylvania, on the Harrisburg Division. The request is to permit two regularly scheduled local freight trains that originate at Abrams Yard, operations over the specified portion of the Morrisville Line in order to access the Dale Secondary, with train speed not to exceed "Restricted Speed."

Applicant's justification for relief: To improve and increase efficiency of operations, by permitting the use of

non-equipped locomotives in local freight service within the stated specified limits on the Morrisville Line, for the purpose of obtaining headroom to allow train operations from Abrams Yard to the Dale Secondary and vice versa.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. #### Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

#### Docket No. FRA-2004-19603

*Applicant:* Norfolk Southern Corporation, Mr. Brian L. Sykes, Chief Engineer, C&S Engineering, 99 Spring Street, SW., Atlanta, Georgia 30303.

Norfolk Southern Corporation seeks approval of the proposed discontinuance and removal of the automatic block signal system, on the two main tracks, between "CP Stell," milepost EP-68.2, Lemoyne, Pennsylvania, and "CP Day," milepost EP-69.8, Enola, Pennsylvania, on the Harrisburg Division, Port Road Branch. The proposed changes include conversion of the method of operation to Industrial Track Rules (NORAC Rule 98), and reduction of the maximum authorized speed in the application area to Restricted Speed.

The reason given for the proposed changes is that Enola Yard was recently upgraded, increasing the number of switching moves; the approval requested in this application would provide greater operational efficiency.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.
