

stationed on both upstream and downstream sides of the lock to assist and speed up the lock process). The study is also evaluating ecosystem restoration measures that include island building, fish passage structures at locks and dams, floodplain restoration, water-level management, backwater restoration, side channel restoration, wing dam/dike alteration, island protection, shoreline protection, and increased topographic diversity of the floodplain. An adaptive management framework for integrated system management is also being evaluated. Combinations of these measures, along with the 'no action' alternative, are being evaluated to form an array of alternatives that would eventually result in a recommended dual-purpose plan.

An interim study report, whose contents include the restructuring philosophy of sustainability, brief problem assessments, preliminary scenario evaluation, descriptions of potential measures, and a discussion of implementation issues, was completed in July 2002 and provided a 'blueprint' for moving forward. Further economic and environmental data collection and evaluations have been completed since then.

4. Stakeholders voiced many issues and concerns during the scoping for the original study, conducted formally in 1994. The NRC and Federal Principles Task Force echoed many of the concerns in their reviews and statements. The emphasis in the restructured study on collaboration and a more comprehensive, holistic consideration of the multiple uses of the Upper Mississippi River system aims to address these issues and concerns. Existing coordination bodies, such as the environmental, economic, engineering, and "Governor's Liaison" committees have been influential throughout the study. Public involvement has included newsletter distribution to a mailing list of approximately 9,300 persons, a toll-free information phone line, and a Web site <http://www2.mvr.usace.army.mil/umr-iwwsns/>. Since the restructuring of the study, public meetings were held in March 2002 and October 2003.

5. A final study report and DPEIS are anticipated to be completed in April 2004.

Dated: February 2, 2004.
