PPL Holtwood, LLC; Notice of Availability of Environmental Assessment

January 5, 2005.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has reviewed the application for a new license for the Lake Wallenpaupack Hydroelectric Project, located on the Wallenpaupack Creek and Lackawaxen River, in Pike and Wayne Counties, Pennsylvania, and has prepared an Environmental Assessment (EA). In the EA, Commission staff analyze the potential environmental effects of relicensing the project and conclude that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. l. This application is not ready for environmental analysis at this time.

m. *The existing project consists of*: (1) The 209-foot-high, 670-foot-long concrete thin arch dam with a crest elevation of 7,814 feet above mean sea level (msl); (2) the Williams Fork reservoir with a surface area of 1,628 acres and storage of 96,822 acre-feet at elevation 7,811 feet msl; (3) a reinforced concrete penstock intake on the face of the dam, with a 7-foot by 5-foot fixed wheel penstock gate controlling flows into a 66-inch-diameter steel penstock running through the dam; (4) river outlet works on the face of the dam, leading to a 54-inch-diameter steel embedded pipe that conveys water to the outlet works valves; (5) a 66-foot-long, 30-foot-wide, 60-foot-high concrete powerhouse at the toe of the dam, containing one vertical-axis turbine/generator with a capacity of 3,150 kilowatts (kW); (6) a tailrace excavated in the streambed rock, carrying the combined powerhouse and river outlet discharges; (7) a 60-foot by 40-foot switchyard; (8) and appurtenant equipment.

The applicant requests the Commission to first review the application for a small hydroelectric power project exemption from licensing, in which the applicant would increase the project's generating capacity to 3,650 kW by installing a second turbine/generator. If the project with the proposed capacity increase does not qualify for an exemption, the applicant requests that this application be considered an application for a new license, under which the applicant would continue to operate the existing turbine/generator with a 3,150-kW capacity and would not install a second unit.
