SUPPLEMENTARY INFORMATION:**I. Abstract**

The National Marine Fisheries Service (NMFS) Northeast Region manages the Atlantic surf clam and ocean quahog fisheries of the Exclusive Economic Zone (EEZ) of the Northeastern United States through the Atlantic Surf Clam and Ocean Quahog Fishery Management Plan (FMP). The Mid-Atlantic Fishery Management Council prepared the FMP pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson Act). The regulations implementing the FMP are specified under 50 CFR part 648.70.

The recordkeeping and reporting requirements at § 648.70 and § 648.74 form the basis for this collection of information. NMFS Northeast Region requests information from Atlantic surf clam and ocean quahog individual transferable quota (ITQ) allocation holders in order to process and track requests from the allocation holders to transfer quota allocation to another entity. NMFS Northeast Region also requests information from Atlantic surf clam and ocean quahog permit holders in order to track and properly account for Atlantic surf clam and ocean quahog harvest that is shucked at sea. Because there is not a standard conversion factor for estimating unshucked product from shucked product, NMFS requires vessels that choose to shuck product at sea to carry on board the vessel a NMFS approved observer to certify the amount of Atlantic surf clam and ocean quahog harvested. This information, upon receipt, results in an increasingly more efficient and accurate database for management and monitoring of fisheries of the Northeastern U.S. EEZ.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

Authorization may be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses, and that the permissible methods of taking and requirements pertaining to the monitoring and reporting of such takings are set forth. NMFS has defined "negligible impact" in 50 CFR 216.103 as "...an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival."

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the United States can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as:

any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Section 101(a)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close
