# **Background**

On April 29, 2003, the Salt Lake City Air Route Traffic Control Center (ARTCC) requested an airway segment be added to V-536 because of their reliance on non-radar procedures to separate aircraft in the area between Great Falls, Helena, and Bozeman, MT. Modifying this route will provide ARTCC a more efficient means of handling aircraft over flights going to Bozeman, MT and points beyond, as well as navigating into/out of Helena, MT. This action addresses that request.

#### The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to modify V-536 by adding a route from the Great Falls, MT, VORTAC to the SWEDD intersection. The purpose of the proposed airway segment is to enhance the management of aircraft transiting between Great Falls, MT, and Bozeman, MT.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
