Natural Resources Conservation Service

Haynes Creek—Brushy Fork Creek Watershed Structure No. 3: Gwinnett County, GA

AGENCY: Natural Resources Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR part 1500); and the Natural Resources Conservation Service Regulations (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact

statement is not being prepared for the, Haynes Creek—Brushy Fork Creek Watershed Structure No. 3: Gwinnett County, Georgia.

FOR FURTHER INFORMATION CONTACT: Jimmy Bramblett, Water Resources Programs Leader, Natural Resources Conservation Service, Federal Building, 355 East Hancock Avenue, Athens, Georgia 30601, telephone (706) 546-2073, e-mail jimmy.bramblett@ga.usda.gov.

SUPPLEMENTARY INFORMATION: The Environmental Assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, James E. Tillman Sr., State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project purpose is continued flood prevention. The planned works of improvement include upgrading an existing floodwater retarding structure.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the U.S. Environmental Protection Agency and to various Federal, State, and local agencies and interest parties. A limited number of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Jimmy Bramblett at the above number.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

James E. Tillman, Sr.,
State Conservationist.

(This activity is listed in the Catalog of Federal Domestic Assistance under 10.904, Watershed Protection and Flood Prevention, and is subject to the provisions of Executive Order 12372, which requires inter-government consultation with State and local officials.)

Finding of No Significant Impact for Haynes Creek—Brushy Fork Creek Watershed Structure No. 3, Gwinnett County, Georgia, June 2005.

Introduction

The Haynes Creek—Brushy Fork Creek Watershed is a federally assisted action authorized for planning under Public Law 106-472, the Watershed Rehabilitation Act, which amends Public Law 83-566, the Watershed Protection and Flood Prevention Act. An environmental assessment was undertaken in conjunction with development of the watershed plan.

This assessment was conducted in consultation with local, State, and Federal agencies as well as with interested organizations and individuals. Data developed during the assessment are available for public review at the following location: U.S. Department of Agriculture, Natural Resources Conservation Service, 355 East Hancock Avenue, Athens, Georgia 30601.

Recommended Action

This document describes a plan for upgrading an existing floodwater retarding structure, Haynes Creek—Brushy Fork Creek Watershed Structure No. 3, to meet current dam safety criteria in Georgia. The plan calls for construction of a roller compacted concrete spillway over the embankment of the existing earthen dam. Works of improvement will be accomplished by providing financial and technical assistance through an eligible local sponsor.

The principal project measures are to:

1. Construct a 220-foot wide roller compacted concrete (RCC) chute spillway to protect underlying soil materials from erosion during overtopping. The RCC will be constructed with an ogee at elevation 951.7 ft. MSL. This constructed auxiliary spillway is designed to bring the existing dam into compliance with current dam safety criteria in Georgia. The current auxiliary spillway will be removed from service.

2. The measures will be planned and installed by developing a contract with the current operator of the dam.

Effects of Recommended Action

Installing a roller compacted concrete spillway will bring Haynes Creek—Brushy Fork Creek Watershed Structure No. 3 into compliance with current dam safety criteria. This will essentially eliminate the risk to loss of life for individuals in 17 homes and 8 roads downstream. Additional effects will include continued protection against flooding, continued water quality benefits, continued fishing activities, continued recreational opportunities, protected land values, protected road and utility networks, and reduced maintenance costs for public infrastructure.

Wildlife habitat will not be disturbed during installation activities. No wetlands, wildlife habitat, fisheries, prime farmland, or cultural resources will be destroyed or threatened by this project. Some 13 acres of wetland and wetland type wildlife habitat will be preserved. Fishery habitats will also be maintained.
