

impacts. On June 16, 2005 (70 FR 35122), we published a notice in the **Federal Register** announcing our intent to prepare an EIS to analyze the effects of possibly revising our regulations pertaining to excess spoil generation and disposal and stream buffer zones. We asked for your input regarding the scope of impacts of the proposed action, the topics that we should examine, and any reasonable alternatives that should be considered. We also said that we would hold meetings if there was sufficient interest in having such meetings.

Eighteen people, some representing organizations, contacted us and asked for meetings in various locations in the Appalachian coal fields. We are pleased to accommodate these requests by holding four meetings at the sites listed under **ADDRESSES**.

These meetings will be open to anyone who would like to attend and participate. The primary purpose of the meetings is to assist us in focusing the preparation of the upcoming EIS on those significant issues and reasonable alternatives related to the proposed action. Other issues to be discussed are impact topics, data needs, and national, State, and local concerns. The meetings will be informal and interactive and, where possible, seating will be around small tables to facilitate the exchange of ideas. The meetings are not intended to be adversarial or a debate on the merits of the proposed action.

We will keep detailed notes of the meeting and make these notes publicly available in the administrative record. Please note that we will not have a court reporter present and oral testimony will not be taken and transcribed, but we will accept written comments and suggestions regarding the upcoming EIS.

Any disabled individual who needs special accommodation to attend a public hearing is encouraged to contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 3, 2005.
