

ENVIRONMENTAL PROTECTION AGENCY

[OECA-2005-0034; FRL-7953-4]

Agency Information Collection Activities; Submission for OMB Review and Approval; Comment Request; NESHAP for Inorganic Arsenic Emissions From Glass Manufacturing Plants (Renewal), ICR Number 1081.08, OMB Number 2060-0043**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: In compliance with the Paperwork Reduction Act, this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. This ICR is scheduled to expire on October 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before September 15, 2005.

ADDRESSES: Submit your comments, referencing docket ID number OECA-2005-0034, to (1) EPA online using EDOCKET (our preferred method), by e-mail to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Enforcement and Compliance Docket and Information Center, Mail Code 2201T, 1200 Pennsylvania Ave., NW., Washington, 20460, and (2) OMB at: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT:

Learia Williams, Compliance Assessment and Media Programs Division, Office of Compliance, (Mail Code 2223A), Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number: (202) 564-4113; fax number: (202) 564-0050; e-mail address: williams.learia@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On May 6, 2005 (70 FR 24020), EPA sought comments on this ICR pursuant

to 5 CFR 1320.8(d). EPA received no comments.

EPA has established a public docket for this ICR under Docket ID Number OECA-2005-0034, which is available for public viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center is: (202) 566-1752. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NESHAP for Inorganic Arsenic Emissions from Glass Manufacturing Plants (Renewal).

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for inorganic arsenic emissions from glass manufacturing plants were proposed on July 20, 1983, and promulgated on August 4, 1986,

and were amended on May 31, 1990, to add an alternative test method. These standards apply to each glass melting furnace that uses commercial arsenic as a raw material.

Owners or operators must submit initial notifications, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 49 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of glass manufacturing plants that emit inorganic arsenic.

Estimated Number of Respondents: 16.

Frequency of Response: Initially, on occasion, annually, and semiannually.
Estimated Total Annual Hour Burden: 3,098 hours.

Estimated Total Capital and Operations & Maintenance (O&M) Annual Costs: \$306,106, which includes \$0 annualized capital/startup costs, \$56,000 annual O&M costs, and \$250,106 Respondent Labor Costs.

Changes in the Estimates: There is a decrease of 1,426 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to a decrease in the number of sources. Our data indicates that there are approximately sixteen sources to the rule, as compared to the active ICR that shows twenty-eight sources. There are no new facilities expected to be constructed in the next three years. The burden in the renewed ICR shows a higher cost for each respondent than in the active ICR, this is due to the fact that we are presently accounting for management and clerical person hours per year in the renewal ICR, which was omitted in the active ICR, and a revised salary table.

Dated: August 8, 2005.

Oscar Morales,

Director, Collection Strategies Division.

Title: National Emission Standards for Hazardous Air Pollutant Emissions for Polyether Polyol Production.

Abstract: The National Emissions Standards for Hazardous Air Pollutants for Polyether Polyols Production, (40 CFR part 63, subpart PPP) was proposed on June 1, 1999 and published January 30, 2002. These regulations apply to new and existing facilities that engage in the manufacture of polyether polyols (which also include polyether mono-ols) and emit hazardous air pollutants (HAP). Owners or operators of polyether polyols production facilities to which this regulation is applicable must choose one of the compliance options described in the rule or install and monitor a specific control system that reduces HAP emissions to the compliance level. The respondents are also subject to sections of 40 CFR part 63, subpart A.

All existing sources must be in compliance with the requirements of subpart PPP within three years of the effective date (promulgation date) of standards for an affected source. All new sources must be in compliance with the requirements of subpart PPP upon startup or the promulgation date of standards for an affected source, whichever is later. Compliance is assumed through initial performance testing or design analysis, as appropriate, and ongoing compliance is demonstrated through parametric monitoring. Types of parameters
