

to NESHAP. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 166 hours (rounded) per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Major sources that pickle steel using hydrochloric acid or regenerate hydrochloric acid using continuous and batch pickling lines, acid regeneration units, and stationary acid storage vessels.

Estimated Number of Respondents: 72.

Frequency of Response: Initial, semiannual and on-occasion.

Estimated Total Annual Hour Burden: 25,448 hours.

Estimated Total Annual Costs: \$2,063,697, which includes \$830 annualized capital/startup costs, \$8,494 annual O&M costs, and \$2,054,373 annual labor costs.

Changes in the Estimates: There is an increase of 344 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR burdens. This increase is due to an increase in the number of new or modified sources. In addition, there was a small increase on the annualized cost associated with operation and maintenance costs for continuous

emission flow rate monitors by existing sources.

Dated: August 8, 2005.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[OECA-2005-0044; FRL-7955-2]

Agency Information Collection Activities; Submission for OMB Review and Approval; Comment Request; NSPS for Primary and Secondary Emissions From Basic Oxygen Furnaces (Renewal); OMB Number 2060-0029; EPA ICR Number 1069.08

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act, this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. This ICR is scheduled to expire on October 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before September 19, 2005.

ADDRESSES: Submit your comments, referencing docket ID number OECA-2005-0044, to (1) EPA online using EDOCKET (our preferred method), by e-mail to docket.oeca@epa.gov, or by mail to: Environmental Protection Agency, EPA Docket Center (EPA/DC), Enforcement and Compliance Docket and Information Center, Mail Code 2201T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, and (2) OMB at: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: María Malavé, Compliance Assessment and Media Programs Division (Mail Code 2223A), Office of Compliance, Environmental Protection Agency, 1200 Pennsylvania Avenue, NW.,

Washington, DC 20460; telephone number: (202) 564-7027; fax number: (202) 564-0050; e-mail address: malave.maria@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On May 6, 2005 (70 FR 24020) EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments.

EPA has established a public docket for this ICR under Docket ID Number OECA-2005-0044, which is available for public viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is: (202) 566-1752. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the

electronic docket at 67 *FR* 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NSPS for Primary and Secondary Emissions from Basic Oxygen Furnaces (Renewal).

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subparts N and Na were proposed on were proposed on June 11, 1973, and promulgated on March 8, 1974. These regulations apply to each basic oxygen process furnace (BOPF) in an iron and steel plant commencing construction, modification or reconstruction after the date of a proposal. An opacity limit was promulgated on April 13, 1978, as a supplement to the mass standard. On January 20, 1983, amendments to the Standards of Performance for Primary Emissions from Basic Oxygen Process Furnaces, merged with Standards of Performance for Secondary Emissions from Basic Oxygen Process Steelmaking Facilities (Subpart Na). Subpart Na is applicable to any top-blown BOPF, hot metal transfer station or skimming station for which construction, reconstruction, or modification commenced after January 20, 1983.

The monitoring, recordkeeping, and reporting requirements outlined in the rule are similar to those required for other NSPS regulations. Consistent with the NSPS General Provisions (40 CFR part 60, subpart A), respondents would submit initial notifications, conduct performance test and report test results for the primary emission control devices, and submit periodic reports. Sources also must develop and implement a Startup, Shutdown, and Malfunction Plan (SSMP) and submit semiannual reports of any event where the procedures in the plan were not followed. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 158 hours

(rounded) per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Basic oxygen process furnace shops at iron and steel plants with furnaces, skimming stations and/or hot metal transfer stations.

Estimated Annual Number of Respondents: 5.

Frequency of Response: Initial, semiannual and on occasion.

Estimated Total Annual Hour Burden: 1,896 hours.

Estimated Total Annual Costs: \$179,440, which includes \$18,000 annualized capital/startup costs, \$8,397 annual O&M costs, and \$153,043 annual labor costs.

Changes in the Estimates: There is an increase of 884 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the number of modified/reconstructed sources. There is also a small increase on the annualized cost on the renewal of this ICR (from \$25,794 to 26,397 or \$603) associated with an increase in the operation and maintenance costs resulting from the increase in the number of sources. However, this increase is not reflected in the OMB 83-I form due to rounding of the values.

Dated: August 9, 2005.
