NUCLEAR REGULATORY COMMISSION

[Docket No. 50-305]

Dominion Energy Kewaunee, Inc.; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Dominion Energy Kewaunee, Inc., (the licensee) to withdraw its June 1, 2004, application for proposed amendment to Facility Operating License No. DPR-43 for the Kewaunee Nuclear Plant, located in Kewaunee County, Wisconsin.

The proposed amendment would have modified the Technical Specifications (TS) to revise TS 1.0,

"Definitions," Table 3.5-2, "Instrument Operation Conditions for Reactor Trip," and Table 4.1-1, "Minimum Frequencies for Checks, Calibrations, and Test of Instrument Channels," proposed to change the requirement to perform the channel test and channel calibration "once per operating cycle." The proposed changes would have added a definition for "staggered test basis," increase surveillance test intervals for the analog channels and logic cabinets of the reactor protection system and engineered safety featured actuation system, and would have added a completion time for the reactor trip breakers. Subsequently, by letter date August 4, 2005, you withdrew the amendment request. The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on July 6, 2004 (69 FR 40676). However, by letter dated August 4, 2005, the licensee withdrew the proposed amendment.

For further details with respect to this action, see the application for amendment dated June 1, 2004, and the licensee's letter dated August 4, 2005, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area 01 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. SUPPLEMENTARY INFORMATION:

I. Introduction

Pursuant to 10 CFR Part 2.106, the U.S. Nuclear Regulatory Commission (NRC) is providing notice of termination of Source Material License No. SUB-986, and authorizing the release of Kerr McGee Corporation Technical Center (Licensee) located at 3301 NW 150th Street, Oklahoma City, Oklahoma, for unrestricted use. The Licensee's request for an amendment to authorize decommissioning of its Technical Center was previously noticed in the **Federal Register** on July 12, 2001 (66 FR 36605) with an opportunity for hearing.

Kerr McGee Corporation provided a final radiological status survey and performed an indoor and outdoor dose analysis to demonstrate the site meets the license termination criteria in Subpart E of 10 CFR Part 20. In addition, NRC staff conducted independent measurements of soils and surfaces at the site. The NRC staff has evaluated Kerr McGee Corporation's request, reviewed the results of the final radiological survey, and determined that the site meets the unrestricted use dose criteria in 10 CFR 20.1402. The Commission has concluded that the site is suitable for release for unrestricted use and has terminated the license for Kerr McGee Corporation Technical Center, Oklahoma City, Oklahoma, property. The NRC staff issued a Final Safety Evaluation Report (SER) on August 1, 2005, to support the proposed action.

II. Further Information

reviewed and NRC's conclusion.
