

mechanism to provide for broadly based and sustained financial support for wetland conservation activities, Congress passed and the President signed into law the NAWCA. The purpose of NAWCA, as amended, is to promote, through partnerships, long-term conservation of North American wetland ecosystems and the waterfowl and other migratory birds, fish, and wildlife that depend upon such habitat. Principal conservation actions supported by NAWCA are acquisition, enhancement, and restoration of wetlands and wetlands-associated habitat.

In addition to providing for a continuing and stable funding base, NAWCA establishes an administrative body, the North American Wetlands Conservation Council, made up of a State representative from each of the four flyways, three representatives from wetlands conservation organizations, the Secretary of the Board of the National Fish and Wildlife Foundation, and the Director of the Service. The Council recommends funding of select wetlands conservation project proposals to the Migratory Bird Conservation Commission (MBCC). Competing for grant funds involves applications from partnerships that describe in substantial detail project locations, project resources, future benefits, and other characteristics, to meet the standards established by the Council and the requirements of NAWCA.

Materials that describe the program and assist applicants in formulating project proposals for Council consideration are available on our Web site at <http://birdhabitat.fws.gov>. Persons who do not have access to the Web site may still obtain instructional materials by mail. There has been virtually no change in the scope and general nature of these instructions since the OMB first approved the information collection in 1999. Instructions assist applicants in formulating detailed project proposals for Council consideration. The instructional materials, including any hard or electronic copy and information or other instruments, are the basis for this information collection request. Notices of funding availability, which are updated regularly, are posted on the Grants.gov Web site (<http://www.grants.gov>) as well as in the Catalog of Federal Domestic Assistance. We use information collected under this program to respond to audits, program planning and management, program evaluation, Government Performance and Results Act reporting, Standard Form 424 (Application For Federal Assistance), grant agreements, budget

reports and justifications, public and private requests for information, data provided to other programs for databases on similar programs, congressional inquiries, and reports required by NAWCA.

If we do not collect this information, we would have to eliminate the program because it would not be possible to determine eligibility and the relative worth of the proposed projects or to meet our legal responsibilities under the Act and regulations. Reducing the frequency of collection would only reduce the frequency of grant opportunities, as the information collected is unique to each project proposal. Discontinuation of the program is not a viable option.

Title of Collection: Information Collection in Support of Grant Programs Authorized by the North American Wetlands Conservation Act (NAWCA).

OMB Control Number: 1018-0100.

Form Number(s): None.

Frequency of Collection: Occasional. The Small Grants program has one project proposal period per year and the Standard Grants program has two per year. Annual reports are due 90 days after the anniversary date of the grant agreement. Final reports are due 90 days after the end of the project period. The project period is 2 years.

Description of Respondents: Households and/or individuals; businesses and/or other for-profits organizations; educational organizations; not-for-profit institutions; Federal Government; and State, local and/or tribal governments.

Total Annual Burden Hours: 37,600. We estimate 80 hours for each Small Grant and 400 hours for each Standard Grant.

Number of Respondents: Approximately 150. We estimate 70 proposals for the Small Grants program and 80 for the Standard Grants program. Approximately half of the projects submitted are funded.

We interviewed five previous and current recipients of NAWCA grants with regard to three aspects of the grants programs: the availability of the information requested, the clarity of the instructions, and the annual burden hours for preparing applications and other materials, such as annual and final reports for both the Small Grants and the Standard Grants programs. All respondents advised that the information regarding descriptions of both programs and application instructions are readily available and the clarity of the information/instructions for both programs is good, even considering the level of detail and

technical information required in the Standard Grants program application.

We invite your comments on: (1) Whether or not the collection of information is necessary for the proper performance of the NAWCA grants programs, including whether or not in the opinion of the respondent the information has practical utility; (2) the accuracy of our estimate of the annual hour burden of information requested; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents. The information collection in this program is part of a system of records covered by the Privacy Act (5 U.S.C. 552(a)).
