

accommodate eyeglasses, and a low-profile battery pack. Minus-blue filter screens glare from cockpit instrument lighting; class B filter (available with some variants) can accommodate aircraft color displays. Other features include low-distortion optics and automatic brightness control. The Night Vision Imaging System modification includes cockpit modifications to provide NVG-compatible cockpit lighting that optimizes NVG sensitivity, as well as external lighting capable of operating in a covert mode wherein only NVG-equipped personnel can see the aircraft external lighting. Hardware is Unclassified; and technical data and documentation to be provided are Unclassified.

7. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

- as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Kuwait - Technical/Logistics Support for F-18 Aircraft

The Government of Kuwait has requested a possible sale of continuing logistics support, contractor maintenance, and technical services in support of the F/A-18 aircraft to include contractor engineering technical services, contractor maintenance support, avionics software, engine component improvement and spare parts, technical ground support equipment, spare and repair parts, supply support, publications and technical data, engineering change proposals, U.S. Government and contractor technical and logistics personnel services and other related elements of program support. The estimated cost is \$295 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic progress in the Middle East.

The Government of Kuwait needs the contractor technical, maintenance, and logistical services to maintain the operational capabilities of its aircraft, previously procured from the United States. These contractor services will provide for a continuation of the required logistics support through CY 2011.

The contractor maintenance and training technical services will not alter the basic military balance in the region.

The principal contractors participating in this proposed sale are DYNCORP of Fort Worth, Texas; The Boeing Company of St. Louis, Missouri; and Anteon Corporation of Fairfax, Virginia. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of 50 contractor representatives in Kuwait to maintain continuity in the program support through CY 2011.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

BILLING CODE 5001-06-C

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board

AGENCY: Department of Defense.

ACTION: Notice of advisory committee meeting.

SUMMARY: The Defense Science Board Task Force on Organizational Structures for Stabilization Operations will meet in open session September 2, 2005, from 1300-1700 at the Pentagon, Room 3E947, Washington, DC. The task force will address organizational structures necessary to support or conduct stability operations. At this meeting, the Defense Science Board Task Force will focus on: (1) What organizational change is needed within OSD Policy, the Joint Staff and the rest of DoD to manage implementation—that is, to ensure that

the designated capabilities are created and the interagency and joint vision are followed at various DoD levels; (2) What organizational change is needed within DoD to improve our ability to conduct or support stability operations—including employing and integrating DoD capabilities with those of other Departments and Agencies, NGOs, international organizations and the private sector; (3) What should be the timing and sequence of organization change within DoD; (4) What additional staffing is required for any new or
