### Federal Energy Regulatory Commission

[Docket No. CP05–92–000]

#### **Liberty Gas Storage, L.L.C.; Notice of Availability of the Environmental Assessment for the Proposed Liberty Gas Storage Project**

August 26, 2005.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Liberty Gas Storage, L.L.C. (Liberty Gas Storage) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the proposed Liberty Gas Storage Project including:

- Two existing brine solution mining caverns owned by PPG Industries, Inc. (PPG) (PPG Cavern 15 and PPG Cavern 17) that would be converted to natural gas storage caverns capable of storing 23.4 billion cubic feet (Bcf) of natural gas; and

- A 1.3-mile-long 20-inch-diameter pipeline with a maximum allowable operating pressure (MAOP) of 3,280 pounds per square inch (psig) that would connect the natural gas storage cavern wells to the new On-site Compressor Station.
