

measures and will be analyzed in the EIS. These include water quality, anadromous fish, cultural resources, and socio-economics. The Corps expects other resource concerns to be identified during the scoping process.

The EIS will address measures, alternatives, and impacts on a programmatic level, but will not address site-specific actions. However, the EIS will present the coordination and environmental review steps the Corps will take with regard to subsequent site-specific actions.

The Corps currently anticipates conducting public scoping for this EIS in early 2006. The exact dates, times, and locations of these meetings have not yet been set. The Corps will publicize this information once the meeting arrangements have been made. The Corps invites affected Federal, state, and local agencies, affected Native American tribes, and other interested organizations and persons to participate in the development of the EIS. The Corps will also invite input from the local, interagency sediment management group formed under the Northwest Regional Dredging Team.

The draft EIS is currently scheduled to be available for public review in fall 2008. The final EIS is currently scheduled to be available for public review in fall 2009.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of Blue Canyon's issuances of securities or assumptions of liability.
