

In addition, the Service will plant and maintain 15 acres of new riparian habitat at Kern Refuge and 10 acres at Pixley Refuge. Herbicides will be used to treat salt cedar on Kern Refuge through foliar spray or cut stump application with a goal of removing 90 percent within 10 years. In addition, the Service will restore 400 acres of valley sink scrub on Kern Refuge.

Under the selected plan, hunting opportunities at Kern Refuge will be increased by opening an additional 540 acres to hunting, and constructing nine new hunting blinds. Other new visitor services projects at Kern Refuge include: developing new interpretive signs and displays, and a new refuge brochure; enhancing the pond at the refuge entrance and constructing a new kiosk and boardwalk; constructing a new 4.3-mile tour route (open every day); and constructing two new photo blinds. In addition, the environmental education program will be expanded and a visitor services plan will be developed. At Pixley Refuge, a new wildlife viewing area and interpretive displays will be constructed on the Turkey Tract adjacent to State Highway 43. Full implementation of the selected plan will be subject to available funding and staffing.
