

Street, SW., Suite 401, Washington, DC 20436, who shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, the Honorable Charles E. Bullock is designated as the presiding administrative law judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondent in accordance with § 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter a final determination containing such findings, and may result in the issuance of a limited exclusion order or cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: March 9, 2006.

Marilyn R. Abbott,

Secretary to the Commission.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Mine Operator Dust Cards

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the

Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(3)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the extension of the information collection related to the 30 CFR Sections 70.209, 71.209, and 90.209—Mine Operator Dust Data Card; 70.201(c), 71.201(c), 90.201(c)—Reporting Operator Sampling Dates; 70.202(b), 71.202(b), and 90.202(b)—Dust Sampling Certification; 70.220(a), 71.220(a), and 90.220(a)—Reporting Status Changes; and 71.300, 71.301(d), 90.300, and 90.301(d)—Respirable Dust Control Plan.

DATES: Submit comments on or before May 15, 2006.

ADDRESSES: Send comments to U.S. Department of Labor, Mine Safety and Health Administration, John Rowlett, Director, Management Services Division, 1100 Wilson Boulevard, Room 2134, Arlington, VA 22209-3939. Commenters are encouraged to send their comments on a computer disk, or via e-mail to Rowlett.John@dol.gov, along with an original printed copy. Mr. Rowlett can be reached at (202) 693-9827 (voice), or (202) 693-9801 (facsimile).

FOR FURTHER INFORMATION: Contact the employee listed in the **ADDRESSES** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Background

30 CFR 70.201(c), 71.201(c), and 90.201(c), authorizes the District Manager to require the mine operator to submit the dates(s) when sampling will begin. Only a certified person is allowed to conduct the respirable dust sampling required by these parts.

Sections 70.202(b), 71.202(b), and 90.202(b), requires that the person must pass the MSHA examination on sampling of respirable coal mine dust.

Sections 70.220(a), 71.220(a), and 90.220(a), requires the operator to report status changes to MSHA in writing within 3 working days after the status change has occurred.

Sections 70.209, 71.209, and 90.209, requires persons who are certified by MSHA to take respirable dust samples to complete the dust data card that accompanies each sample being submitted for analysis.

Sections 71.300 and 90.300 require a coal mine operator to submit to MSHA for approval a written respirable dust control plan within 15 calendar days after the termination date of a citation for violation of the applicable dust standard.

Section 71.301(d) requires the respirable dust control plan to be posted on the mine bulletin board however, 90.301(d) prohibits posting of the dust control plan for P-90 miners and, instead, requires a copy be provided to the affected P-90 miner.

II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA Home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and "Federal Register Documents."

III. Current Actions

The information provided by the mine operator on the dust data card that accompanies each dust sample, the reporting of when such samples will be collected to allow MSHA to observe the actual collection, and the reporting of any changes in operation status affecting sampling, is vital to effectively administer the operator sampling program. This allows MSHA to determine not only whether mine operators have complied with the sampling requirements stipulated in the regulations but also which operators were in noncompliance with the applicable dust standard. After

processing, results are reported back to mine operators for posting on the mine bulletin board and viewing by miners. MSHA also uses this information to plan enforcement activities and evaluate programs.
