National Park Service

36 CFR Part 7

RIN 1024-AC99

Curecanti National Recreation Area, Personal Watercraft Use

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service (NPS) is proposing to designate areas where personal watercraft (PWC) may be used in Curecanti National Recreation Area, Colorado. This proposed rule implements the provisions of the NPS general regulations authorizing park areas to allow the use of PWC by promulgating a special regulation. The individual parks must determine whether PWC use is appropriate for a specific park area based on an evaluation of that area's enabling legislation, resources and values, other visitor uses, and overall management objectives.

DATES: Comments must be received by May 16, 2006.

ADDRESSES: You may submit comments, identified by the number RIN 1024-AC99, by any of the following methods:

—Federal rulemaking portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

—E-mail NPS at CurecantiPWC@urscorp.com. Use RIN 1024-AC99 in the subject line.

—Mail or hand delivery to: Superintendent, Curecanti National Recreation Area, 102 Elk Creek, Gunnison, CO 81230.

—For additional information see “Public Participation” under **SUPPLEMENTARY INFORMATION** below.

SUPPLEMENTARY INFORMATION:

Background

Additional Alternatives

The information contained in this proposed rule supports implementation of the preferred alternative for Curecanti National Recreation Area (CNRA) in the Environmental Assessment (EA) published April, 2003, as modified by the errata issued March 10, 2005. The changes to the environmental assessment in the errata were made to modify the preferred alternative and its analysis, to address public comments on the EA, and to clarify the text. The public should be aware that two other alternatives were presented in the EA, including a no PWC alternative. Those alternatives should also be reviewed and considered when making comments on this proposed rule.

Personal Watercraft Regulation

On March 21, 2000, the National Park Service published a regulation (36 CFR 3.24) on the management of personal watercraft (PWC) use within all units of the national park system (65 FR 15077). This regulation prohibits PWC use in all national park units unless the NPS determines that this type of water-based recreational activity is appropriate for the specific park unit based on the legislation establishing that park, the park's resources and values, other visitor uses of the area, and overall management objectives. The regulation banned PWC use in all park units effective April 20, 2000, except 21 preserves, lakeshores, seashores, and recreation areas. The regulation established a 2-year grace period following the final rule publication to provide these 21 park units time to consider whether PWC use should be allowed. On November 7, 2002 PWC use was discontinued at CNRA.

Description of Curecanti National Recreation Area

Curecanti National Recreation Area (Curecanti) was established in 1965 to provide for conservation of scenic, natural, historic, archeological, and wildlife values. The goal of the National Recreation Area is to provide for public use and enjoyment while ensuring visitor safety, resource preservation, and conservation. Curecanti is located on U.S. Highway 50 (U.S. 50) west of Gunnison, Colorado.

Three reservoirs, named for corresponding dams on the Gunnison River, form the heart of Curecanti National Recreation Area. The three reservoirs are Blue Mesa Reservoir, Morrow Point Reservoir, and Crystal Reservoir. Blue Mesa Reservoir is Colorado's largest body of water and is

home to the biggest Kokanee Salmon fishery in the United States. Morrow Point Reservoir is the beginning of the Black Canyon of the Gunnison. Crystal Reservoir is the site of the Gunnison Diversion Tunnel, a National Historic Civil Engineering Landmark. In addition to the three reservoirs, recently discovered dinosaur fossils, a 5,000 acre archeological district, a narrow gauge train, and traces of 6,000 year old dwellings further enhance the significance of Curecanti.

Purpose of Curecanti National Recreation Area

The purpose and significance statements listed below are from Curecanti's Strategic Plan and General Management Plan. Curecanti National Recreation Area was established for the following purposes:

1. Conserve the scenery, natural, historic, and archeological resources, and wildlife of Curecanti.
2. Provide for public use and enjoyment in such a way as to ensure visitor safety and resource preservation or conservation by establishing and maintaining facilities and providing protection and interpretive services.
3. Manage the lands, waters, and activities of Curecanti in such a way that it does not interfere with the purposes of the Colorado River Storage Project Act and other Bureau of Reclamation agreements affecting the operation of the Aspinall Unit.
4. Mitigate the loss of fish and wildlife resources as a result of the Colorado River Storage Project.

Significance of Curecanti National Recreation Area

The following statements summarize the significance of Curecanti:

1. Blue Mesa Reservoir is one of the largest high-altitude bodies of water in the United States. It provides an exciting diversity of water recreation opportunities for windsurfers, sail boaters, and water skiers.
2. The scenic values of the canyon, the needles, the pinnacles, and the reservoirs provide dramatic contrast, which causes visitors to slow down, pause, and reflect on the diversity of the landscape and its spaciousness.
3. Curecanti provides one of the best cold-water fishing opportunities in the nation. This is due primarily to the Kokanee salmon run occurring in Blue Mesa. The Morrow Point and Crystal Reservoirs' trout fisheries routinely attract fishing enthusiasts from throughout the nation because of the high-quality trout fishing and uniqueness of the canyon environment.
