

the proposed Ginna EPU. Implementation of the proposed EPU would have less impact on the environment than the construction and operation of a new coal or natural-gas fired plant at an alternative site. In addition, the EPU does not involve environmental impacts that are significantly different from those presented in the 1973 FES for Ginna. Therefore, the NRC staff concludes that the impacts of the no-action alternative would be greater than the impacts of the proposed action based on information in the FES and NUREG-1437 Supplement 14.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the FES and NUREG-1437 Supplement 14.

Agencies and Persons Consulted

In accordance with its stated policy, on [xxxxxxx], 2006, the NRC staff consulted with the State of New York official, [xxxxxxx], of the Energy Research and Development Authority, regarding the environmental impact of the proposed action. The State official had [xxxxxxx] comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the Commission concludes that implementation of the action as proposed would not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's application dated July 7, 2005, as supplemented by letters dated August 15, September 30, December 6, 9, and 22, 2005, and January 11 and 25, and February 16 and March 3 and 24, 2006 (Agencywide Documents Access and Management System (ADAMS) Accession Nos.
