#### Agency Forms Undergoing Paperwork Reduction Act Review

#### Proposed Project

Assessment of Healthcare-associated Adverse Events—New—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC).

#### Background and Brief Description

The Division of Healthcare Quality Promotion (DHQP) disseminates notices and alerts through a voluntary electronic mail subscriber list (*i.e.*, Rapid Notification System) to inform healthcare personnel about healthcare-associated disease outbreaks and clusters or adverse events that may be of national importance and recommendation for preventing infections and antimicrobial resistance.

DHQP is occasionally involved in gathering information to determine if a recognized adverse event (*e.g.*, an infection following the use of a particular product, type of equipment, or with a microorganism that has rarely been reported) has occurred on a

national level in healthcare facilities. The information gained from this assessment will be used to target corrective actions or educational strategies to improve the public's health by preventing future adverse events.

To rapidly determine the scope of adverse events at the time soon after a public health notification or product recall, DHQP seeks to conduct short surveys using OMB approved questions among participants in the Rapid Notification System, National Nosocomial Infection Surveillance (NNIS), and other CDC networks (*e.g.*, partners in healthcare working on innovative infection reduction projects such as the Pittsburgh Healthcare Regional Initiative and the Prevention Epidemiology Centers). The survey will also be posted on the DHQP website to reach additional healthcare professionals. The number of questions in each survey will range from 5 to 10. Data will be collected using a Web-based data collection form.

There are no costs to the respondents other than their time. The total estimated annualized burden hours are 67.
